Drive Data Warehouse Flexibility with Sigma

Cloud-native Analytics Built for Modern Business

Input Sales Forecasts

	Country	FY23 Targets	FY23 Forecasts
1	Austria	$76,000	$129,999
2	Belgium	$128,000	
3	Czech Republic	$72,000	71000
4	Denmark	$225,000	$231,210
5	Ireland	$184,000	
6	France	$380,000	$383,112
7	Germany	$492,000	$499,944
8	Italy	$125,000	$127,647

Input Tables let you easily and securely write new data to your data warehouse

Easy to use, widely adopted

It's no surprise that the average "adoption rate" for analytics is 25% when the tools are so hard to use. Not Sigma. We're built the way you think—in spreadsheets.

SIGMA +90% DAILY USE

Sigma Input Tables

Sigma Input Tables evolve how business users "Bring their own Data" to their cloud data warehouse the same way they would in Excel. Users can add editable tables or columns to add data when it's missing, iterate on it to explore what/ifs, or to capture context across the organization. All edits are secure, auditable, and accessible from the warehouse to be leveraged downstream.

Add New Data	Manually enter data, or copy/paste from your favorite sources and spreadsheets
Analyze the future	Easily change and modify your data to perform what/if analysis and to build predictive scenarios that keep up to date with live data
Manage your source of truth	The data that's added to input tables is yours and in your warehouse. Integrate it throughout your ecosystem as the source of truth

What's next in CTV advertising

"Sigma's input tables have been a turning point for Strategus, giving our users the power to incorporate their data by bridging the gap between information and analysis."

Mark Sussman
Director of Data and Analytics, Strategus

Break down the data warehouse barrier

Make your warehouse more usable and accessible by writing tables directly into the warehouse within a Sigma workbook. Dramatically increase the ease in which your teams can input data into your workflows, improve their ability to run ad-hoc scenarios without additional requests and centralize the capture of transitory business information. Reinvent your team's approach to data interactions using direct inputs to your production grade warehouse.

FY23 Input Sales Forecasts vs. Targets

Input Sales Forecasts

	Country	FY23 Targets	FY23 Forecasts
1	Austria	$76,000	$74,655
2	Belgium	$128,000	$129,999
3	Czech Republic	$72,000	$71,000
4	Denmark	$225,000	$231,210
5	Ireland	$184,000	$191,803
6	France	$380,000	$383,112
7	Germany	$492,000	499943.83|
8	Italy	$125,000	$127,647
9	Netherlands	$149,000	$151,442
10	Portugal	$46,000	$45,481
11	Spain	$100,000	$102,568

Explore, analyze, and report on massive live datasets and leverage your Data Warehouse's data governance within Sigma

Enterprise grade security built for your Chief Security Officer (CISO)

With Sigma, your data never leaves your data warehouse. No extracts, no caching, no data at rest. Everything stays where it belongs and all operations are executed inside the warehouse. With Sigma you get row-level and role-based security to make sure that the right data goes to the right person. Sigma supports key security protocols like GDPR, SAS70, AWS Private Link, HIPAA, Privacy Shield, CCPA, CSA, SOC 3, SOC 2 Type II, and SOC 1 Type II.

Sigma is a cloud-native analytics platform that uses a familiar spreadsheet interface to give business users instant access to explore and get insights from their cloud data warehouse. It requires no code or special training to explore billions of rows, augment with new data, or perform "what if" analysis on all data in real-time.
