

A trusted name in highly effective  
pool solutions since 1988

## Clarifier

Available in 1 litre and 5 litres

---

Swimming pools can become murky or cloudy at times, so we developed CLARIFIER. Using a polymer base ALGON'S CLARIFIER has been very successful for over 10 years. It will turn the cloudiest pool water crystal clear. It also greatly improves filter efficiency and does not alter PH.

For best results:

- Calculate the correct dosage using the table provided and add ALGON'S CLARIFIER to your Spa and/or your pool water spreading it over as large an area as possible and keep your pump running until your pool water is clear.
- Back wash your filter thoroughly.
