You matter. It's such a simple phrase but there is so much power behind those two words. The greatest fear of most school administrators is having a student take their own life. This program helps instill in each and every child that they are a part of something more. That each and every child is important. That each and every child matters. Thank you guys for putting into words what so many of us feel. Each and every student matters to us all.

Again thank you guys for coming out.

Lyle Wallace
Assistant Principal
Philadelphia High School
