VIPER GAMING Announces New DDR5 Performance Memory Lines

VIPER GAMING Announces New DDR5 Performance Memory Lines

FREMONT, CA

VIPER GAMING by PATRIOT MEMORY has announced the upcoming release of two new DDR5 performance memory models: the Viper Xtreme 5 extreme performance lineup and the Viper Elite 5 mainstream performance lineup. Along with these new models, VIPER GAMING will also update their flagship Viper Venom DDR5 line to include new higher speeds and select models featuring AMD EXPO support. All of these new models will be exhibited for the first time at CES 2023 from January 5th to January 8th, with plans to announce release dates in the near future.

Viper Xtreme 5

With the Viper Xtreme 5, VIPER GAMING looks to appeal to the more extreme market of gamers and overclockers. Viper Xtreme 5 models will initially come in 7600 MHz, 7800 MHz and 8000 MHz frequencies and will feature tuned XMP profiles. VIPER GAMING will offer Viper Xtreme 5 kits in capacities from 16 GB to 64 GB. Viper Xtreme 5 modules and kits will come in both RGB and non-RGB variants to appeal to any build aesthetic.

Release dates for the Viper Xtreme 5 will be announced following CES 2023.

Viper Elite 5

With the Viper Elite 5, VIPER GAMING looks to appeal to the more mainstream market of gamers offering frequencies up to 6200 MHz. Viper Elite 5 models will initially come in 5600, 6000 and 6200 MHz frequencies and will feature tuned Intel XMP and AMD EXPO profiles. VIPER GAMING will offer Viper Elite 5 in capacities from 8 GB to 64 GB. Both single and kit packaging will be available. Viper Elite 5 modules and kits will come in both RGB and non-RGB variants to appeal to any build
