DEVICE MOCKUPS

All of these graphics will require Adobe Photoshop

- Click which graphic you would like to choose.
- Click the blue down arrow to start downloading the graphic.
- The graphic will start to download in your internet server.
- If the graphic does not automatically open on its own, go to your downloads folder and double click on the graphic you chose.
- The graphic will start to open in Photoshop.
- To view your layers, click *window > layers.*
- From here you will be able to change the text and the screen shown on the device(s).
- To change the screen on the device, double click on the layer that says, "put your screen here".
- Photoshop will automatically open a new file.
- To place your new device screen into the file, click *file > place embedded*.
- Position the graphic to your liking and click the check mark in the top middle section when you are done.
- On the layers tab, make sure the layers you do not want to use are off.
- To turn off layers, click the eye button to the left of your layer.
- Save the file by clicking *file > save*.
- Close out of this file and go back to the first file.
- You should see you personalized screen shown on the device(s).
- Save the file by clicking *file > save as*.
- To save your file as a JPG or PNG click *file > export > export as > export*.
