Project Checklist

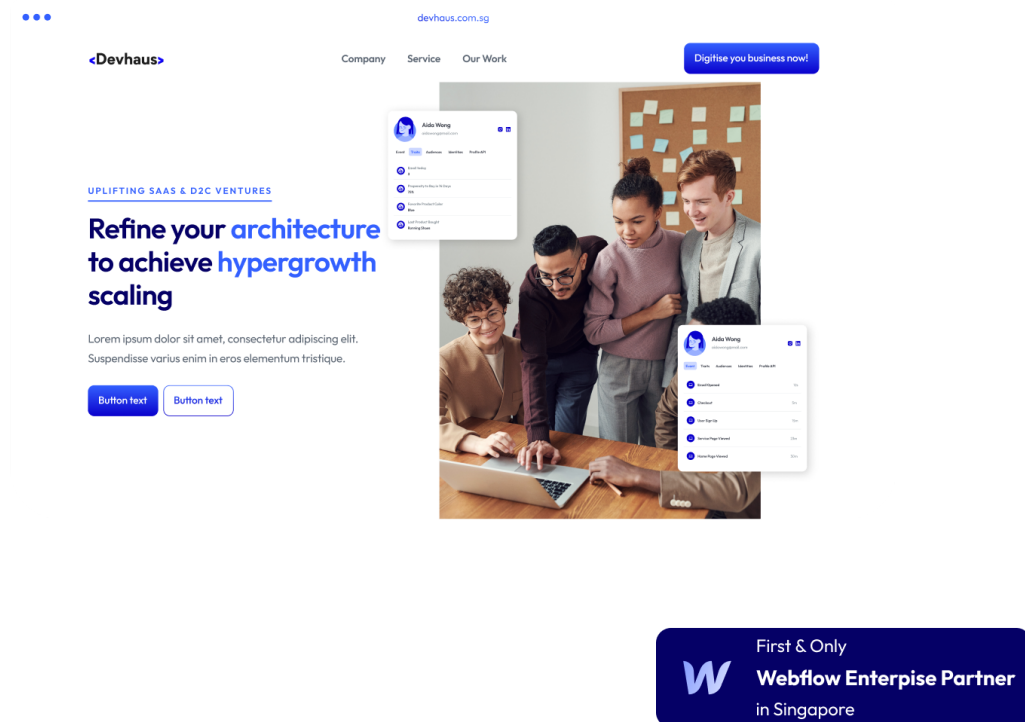

Quality & Affordable Webflow Design & Development made for teams of all sizes.

A subdivision of <Devhaus>

Project Overview - Webflow Lite plan

Get a professional Webflow site in 30 days. Get a page-load online with your domain and hosting. Webflow is an intuitive tool that allows you to design & create high-end, responsive websites without having a background in coding. Have a look into our project implementation checklist to understand better on what we'll be delivering to you over the next 30 days.

Guideline before purchasing our services

Upon the completion of your payment and project onboarding information, here are the main things we'll be delivering to you!

Note that this **DOES NOT INCLUDE**

- **External domain purchase** (you will have to purchase it yourself)
We recommend [Namecheap](#) or [Godaddy](#) for ease of setup
- **Webflow Hosting Plans**
You will have to purchase it individually, more information about [Webflow pricing here](#)
- **External Software Plans or integrations**

< Project Checklist >

☐ **Webflow Lite Plan - US\$5,299**

☐ **Design & Development of up to 10 Pages on Webflow**

We will be building the page up based on the brief and information you've provided for us via the Project onboarding form once you've completed your payment

☐ You may also choose up to **1 CMS** of choice from the options below

To understand better what Webflow CMS (Content Management System) is, [click on this link](#)

- **Jobs/ Careers CMS:** For you to list jobs on your website
- **Blog CMS:** For you to publish your articles, contents and more on your website
- **Campaign Landing pages:** For you to run marketing campaigns

☐ **Responsive design on 4 breakpoints across the your pages**

We will ensure that your designs look responsive on table, mobile landscape and mobile portrait

☐ **Setting up of [Google Analytics 4](#) & [Hotjar](#)**

The setup will only include the page that we've built for you and not future pages added by your team

☐ **Onpage SEO optimisation Meta tags, description and open graphs**

The contents have to be provided by your team, we will optimise it for you on Webflow

☐ **Basic UAT (User acceptance testing)**

Done by our team to ensure that there are no broken links or images

☐ **1x Revision - capped at 8 man-hours**

TAKE NOTE:

The project commencement date will be determined on the day you've fully completed:

1. **Payment** for the service of choice
1. Try checking your spam folder for our email. It might have moved there. Let us know if you are still having trouble getting notifications.
2. Fully **Completed the project onboarding information**
 - a. Should there be any other information that is unclear - our client success team will be in touch with you to align on your needs to ensure that the project we'll be commencing meets your desired expectations.

Upon the completion of the things listed in the checklist above, we'll determine that your project **is completed**. If you're keen to jump onboard for a custom service for more complex needs, please reach out to our Business Development Associate - Iggy; lggy@devhaus.com.sg.

Our **retainer services** for: You will be supported by the team at [Devhaus](#)

- Webflow Development Ongoing Support starts at \$3,600/mth - capped at 40 hours
- Growth & Marketing services starts at \$2,000/mth - capped at 20 hours

Ensure that this information is well prepared from you or your team before onboarding a project.

- **Ensure you've prepared enough information about your project. To help us understand the needs of what we're building for you**

P.s. You will be guided during our onboarding process don't you worry! 😊

Here are some helpful questions to help us align on the understanding of your project:

- **Your market:** whom you choose to serve
- **Your product:** what you sell
- **Your business model:** how you make money
- **Your brand:** how you present yourself to your market and the world
- **Your acquisition channel:** how you get new customers
