

Creating a Premier Carbon Credit Royalty Company

Star Royalties is a Carbon Credit and Precious Metals Royalty Company

- Leveraging the proven royalty model with a first-mover advantage in a high-return carbon credit asset class
- Focus on originating royalties with ~US\$46M invested in 9 assets:
 - **Carbon:** ~US\$21M in 4 royalties
 - **Precious Metals:** ~US\$25M in 4 royalties and 1 stream
- Strategic investment by Cenovus Energy into Green Star Royalties assigned ~C\$82M value to rapidly growing portfolio of carbon credit royalties
 - Star Royalties owns 46%
 - Agnico Eagle Mines and Cenovus each own 26%
- Innovated world's first carbon credit royalties in forestry and in regenerative agriculture
- Emphasis on cash flow visibility, tier 1 jurisdictions and low portfolio risk

Asset by NAV by Commodity

North American Focus with Cash Flow Visibility

1. Regenerative Agriculture Project

- Green Star Royalties finances the application of microbial soil “probiotic” technology on US farmland through Locus AG’s CarbonNOW® program, with corresponding carbon credits marketed by Anew
- Carbon credits are generated from the incremental sequestration of atmospheric CO₂ into soils resulting from the implementation of Locus AG’s biologicals
- Green Star Royalties has a 30% Gross Revenue Royalty on 20 years carbon credit revenues from the CarbonNOW® program

2. EMS Forest Carbon Offset Project

- Carbon credits are generated on Elizabeth Metis Settlement land (16k ha in Alberta) from the combination of trees not being logged and from trees absorbing atmospheric CO₂ and sequestering into biomass
- Green Star Royalties has a 40.5% Gross Revenue Royalty on Elizabeth Metis Settlement’s forest carbon revenue

3. LSFN Forest Carbon Offset Project

- Carbon credits are generated on Lac Seul First Nation Forest (22k ha in Ontario) from the combination of trees not being logged and from trees absorbing atmospheric CO₂ and sequestering into biomass
- Green Star Royalties has a 16% Gross Revenue Royalty on the operator’s forest carbon revenue share

4. MOBISMART Royalty: High-Growth Clean Tech

- Green Star Royalties has a 2.5% Gross Revenue Royalty on revenues of a Toronto-based manufacturer of mobile, portable, easily-deployable, off-grid power generation and storage solutions from 100W to 100kW
- Products reduce diesel fuel usage and CO₂ emissions and associated financial and environmental costs where grid power is unavailable or unreliable

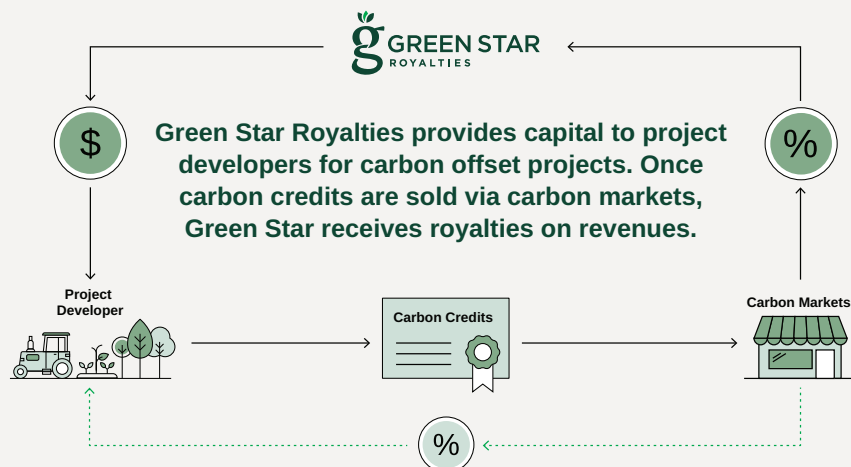

Green Star – Quality Leader in Carbon Financing

- Carbon Credit Royalties in USA and Canada
- Unique Scalability Potential
- Sizeable and Premium Project Pipeline

- Large and Reputable Capital Partners
- Best-in-Class Development Partners
- Tenured Team of Experts

Book Value (Sep. 30, 2023)	US\$45.3M
Basic Shares Outstanding	77.4M

Ownership

1. Estimated revenues calculated using: a) Regen Ag: assumed US\$20/credit with 2.5% annual escalator. b) EMS and LSFN: Government of Canada carbon tax pricing (currently C\$65/credit and escalating to C\$170 credit by 2030).
2. Attributable carbon credits are calculated as attributable revenues divided by their respective carbon credit prices.
3. On November 1, 2023 Star Royalties received C\$1.55M in cash and C\$1M in shares of Sabre Gold Mines Corp. (TSX: SGLD, OTCQB: SGLDF) as partial consideration for restructuring its gold stream on the Copperstone project to 4% of gold produced for the duration of Copperstone's life-of-mine.
