 **RAILIUS**

New Generation of **Stairlift**

Thank you for your interest in our UP Stairlift! This brochure will provide you with information regarding the UP Stairlift.

The first ideas for the UP Stairlift started twenty years ago. Over the years we worked hard as a team to fully develop the UP Stairlift towards the product it is today. We are proud of the result and the hard work. Please, take your time to explore our UP Stairlift.

Kind Regards,
Founder

Dennis Vroegindeweij

UP Stairlift Standard Inclusions

Performance

Intercom

UP Stairlift includes our built-in intercom, making it possible to reach our valued dealer partner, or a personal contact of your choosing any time of the day.*

Foldable Armrests

UP Stairlift include foldable armrests, offering greater comfort, and providing easier access into the seated position, at either landing.

Automatic Swivel

UP Stairlift is equipped with an automatic swivel function, making it safer and much easier to get on and off the seat, at either landing.

Automatic Footrest

UP Stairlift is equipped with an automatic folding footrest, folding out with the automatic swivel, making it safer and easier to access the chair and maximizing the stair space when not in use.

UP Remote App

UP Stairlift can be controlled from your smartphone or tablet, by downloading the secure UP Stairlift App you can move safely between floors on your device.

UP Stairlift Rail

At UP Stairlift we believe today's products need to be future proof. Sustainable manufacturing and reusable products are of great importance, and our unique rail design supports both criteria. Our rail system consists of only 2 parts. These parts are fully reusable and can be converted to match any shape. Furthermore, the rail is made from aluminum produced with machines running on renewable energy. Should you ever wish to remove or relocate your UP Stairlift after years of loyal service, it will remain 100% recyclable and reusable.

Straight

The standard rail parking system is the straight rail.

Horizontal

To maximize your stair access, you may park your UP Stairlift on a horizontal end piece.

Drop Nose

To maximize your hallway area, UP Stairlift offers the rail with a drop nose end piece.

Vintage SAND Color

You can easily configure the **CUSTOM FIT** stairlift on site and install the **SAME DAY!**

Hinge Rail

To minimize an obstruction with your hallway or a door, UP Stairlift offers an optional hinge rail. The hinge rail will fold automatically after use.

Parking Curve 90 Degree

To maximize space, the modular rail parts allow a 90 degree parking curve, for your UP Stairlift to park just around a corner.

Parking Curve 180 Degree

To maximize space, the modular rail parts allow a 180 degree parking curve, for your UP Stairlift to park just around a corner.

UP Stairlift Experience

QUICK INSTALLATION

Thanks to the modular rail and our patented curved rail design, it is possible to perform quick installations and adjustments. The entire UP Stairlift can be installed within 4-6 hours (depending on the configuration) and importantly with no additional or custom factory parts.

STANDARD FEATURES

UP Stairlift goes above industry standard features and offers the intercom, the automatic turning (swivel), and automatic footrest folding as standard. With UP Stairlift you also get a stylish chair, designed by Richmond.

REMOTE SERVICE

UP Stairlift gives you peace of mind and security, as each stairlift will report operation and any maintenance statuses via the integrated WiFi connection. This also allows most difficulties to be solved remotely, by our valued dealer partner. In addition, a technician is able to use this information to prepare and plan their maintenance routes.

STRAIGHT AND CURVED

Thanks to the modular rail design the UP Stairlift is suitable for both straight and curved staircases. With the placement on a curved stair, it is both possible to position the stairlift on the inside or outside inside your home.

RELOCATION POSSIBLE

Your UP Stairlift can be easily relocated. Not only is the chair itself retainable, but also the modular rail design. All rail parts can easily be converted into a new shape and if necessary, be combined with new rail for a different staircase.

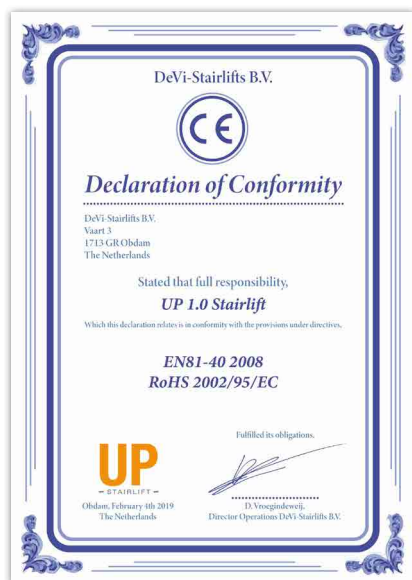

DEALER PORTAL

Our dealer portal gives our valued dealer partner the opportunity to personalize your UP Stairlift, producing the best fit for your specific situation in just a few steps. This gives our valued dealer partner all the tools available to help you in the process, and ensure your personalized UP Stairlift is ordered without having to worry about assembly in your home and factory parts required. This is all part of the service we offer.

UP Stairlift Reliability

Quality and reliability is very important to UP Stairlift. Your confidence to enjoy and access to your home safely for many years to come is our promise.

The UP Stairlift has been twenty years in the making, and has accumulated in offering a reliable and reusable stairlift that is industry shifting for **You**. During the Dutch Design Week (2019) the **UP Stairlift was awarded with the GIO recognition** (Good Industrial Design).

2019 Good Industrial Design

UP Stairlift was awarded with the GIO recognition

UP Stairlift Sustainability

Made with Recycled Material

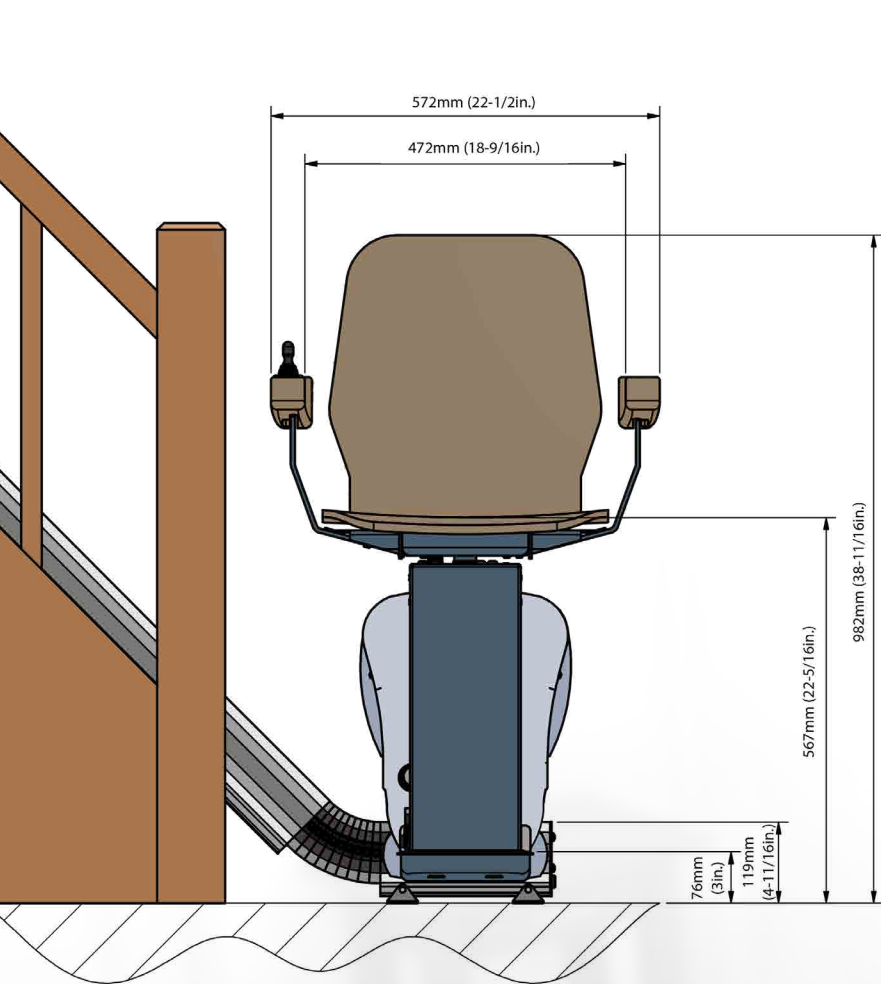

UP Stairlift values sustainability, which is why our stairlifts utilize strong aluminum rail. Aluminum is a durable, lightweight, and sustainable material. The characteristics of aluminum ensures the rail will last for generations and is reusable.

The aluminum used to manufacture our rail is produced by one of the most energy efficient aluminum extruder in the world. They are located in Norway and produce the aluminum extrusion with 70% hydro energy. Our rail manufacturer mainly uses recycled aluminum, with recycling they use only 5% of the energy that would be used to make new aluminum rail. In addition, the recycling of aluminum saves around 80 million tons of greenhouse gases. This corresponds to 15 million cars on the road. UP Stairlift also, utilize efficient packaging transport, minimizing costs for you and our valued dealer partners.

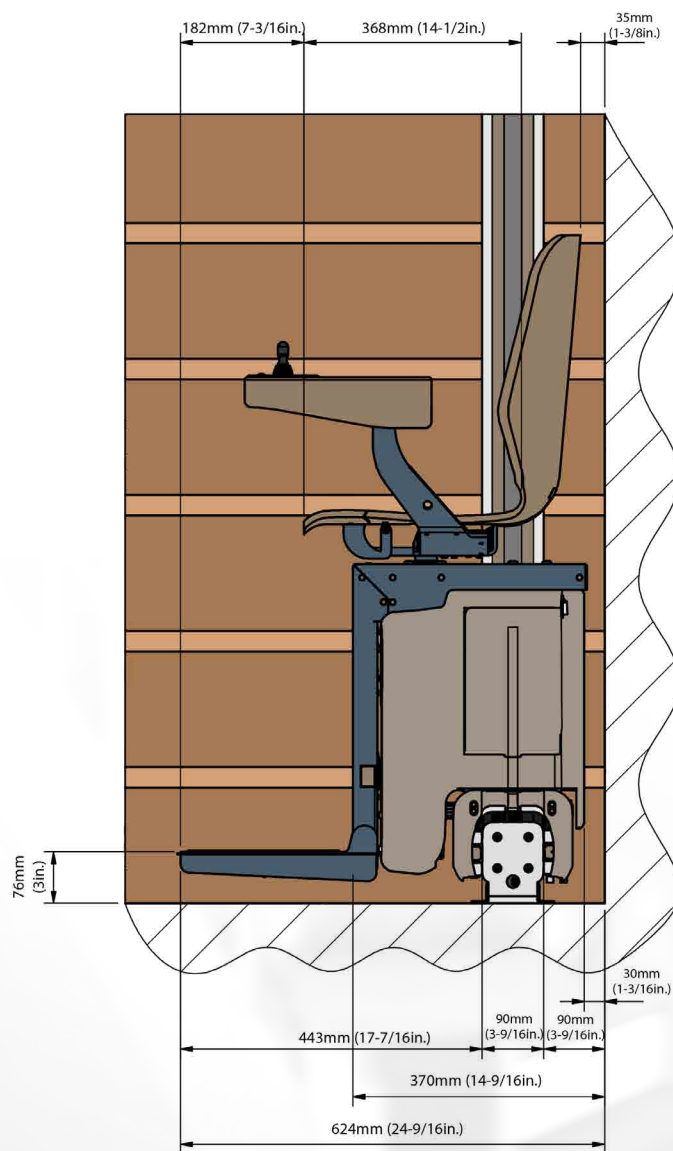

No use of Heavy Chemicals

Another environmental benefit of using aluminum is the fact that it does not corrode. Industry standard commonly powder coat rail to slow down the corroding process. As the UP Stairlift rail uses aluminum, a harmful process for our ecosystem is avoided.

UP Stairlift Dimensions

*Overrun park position shown

UP Stairlift

Specifications

Motor output speed ----- 0.15 meters per second (0.5 feet per second)

Method of drive ----- Rack and pinion

Power input ----- 24V DC (battery)

Max weight ----- 125kg / 275lbs

Rail ----- Modular rail, extruded aluminum,
cast aluminum

Warranty ----- 2 year parts, and 5 year motor

Our stairlift conforms to:

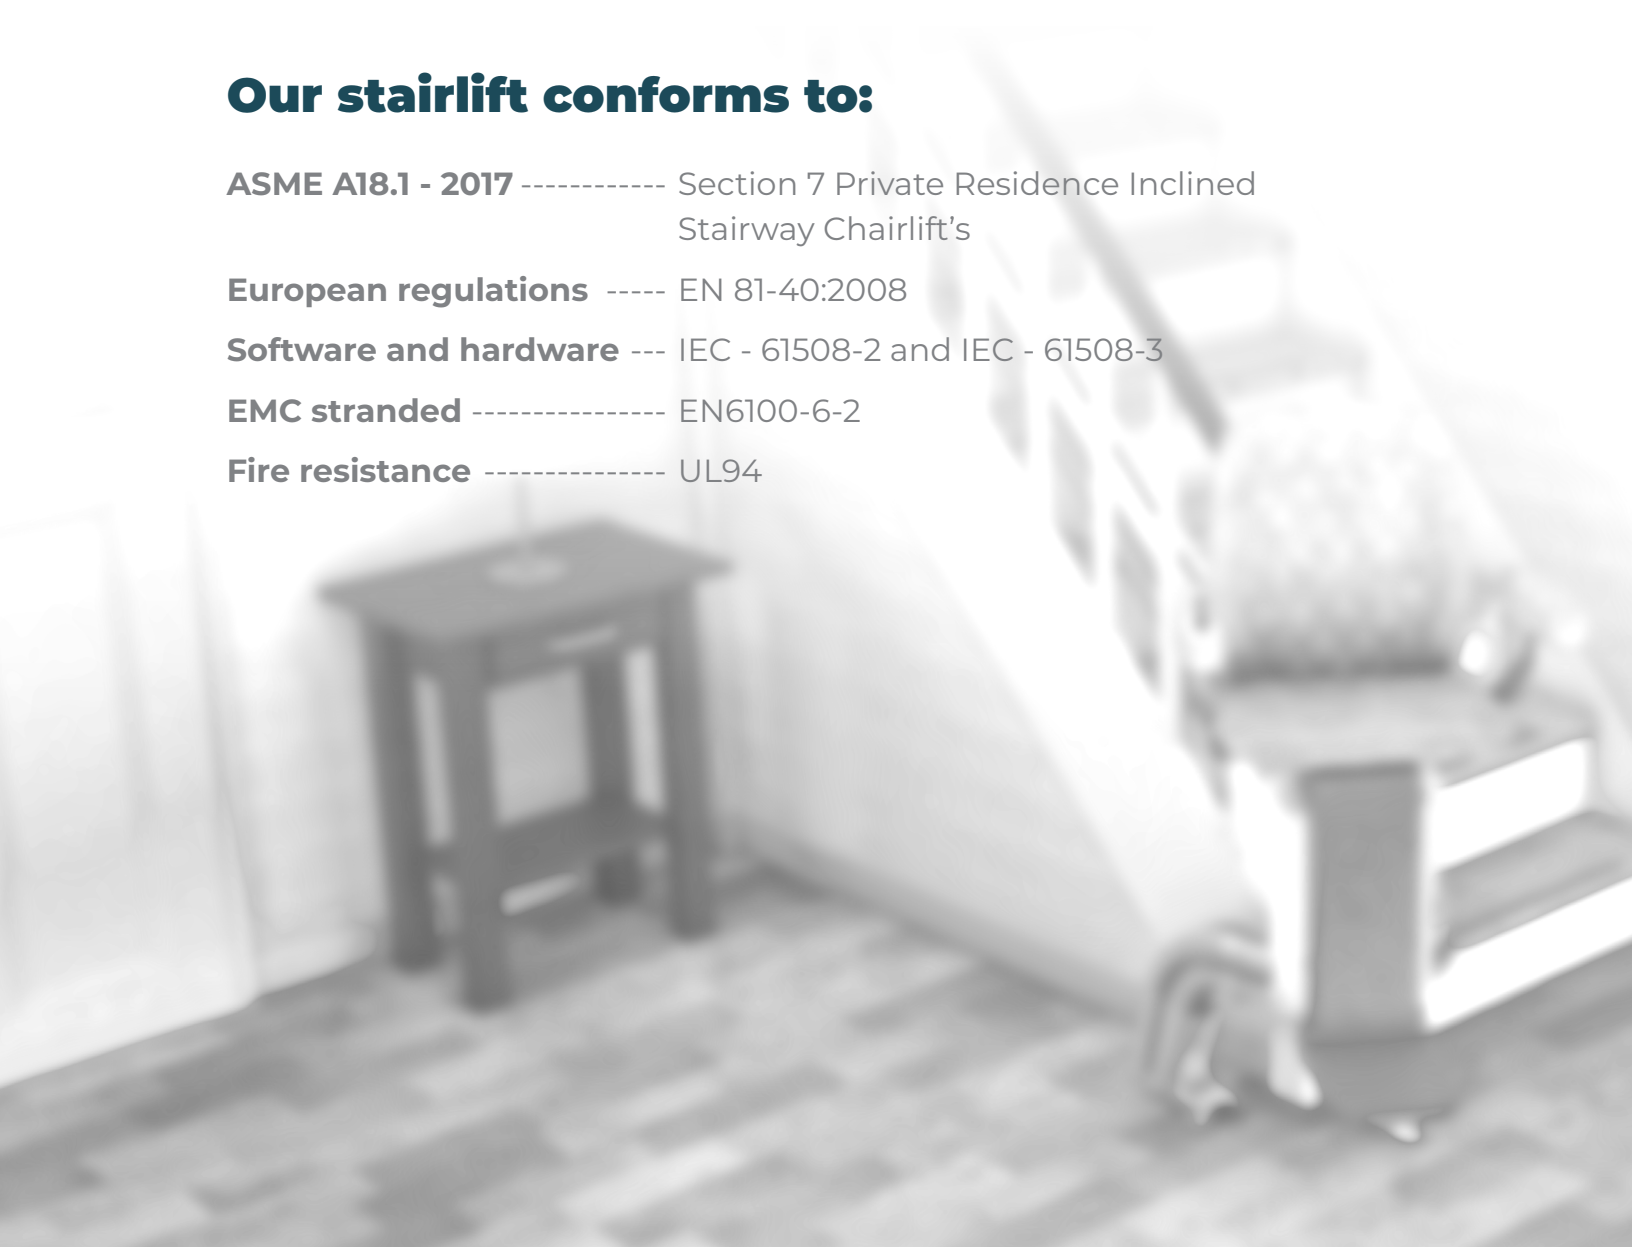

ASME A18.1 - 2017 ----- Section 7 Private Residence Inclined
Stairway Chairlift's

European regulations ----- EN 81-40:2008

Software and hardware --- IEC - 61508-2 and IEC - 61508-3

EMC stranded ----- EN6100-6-2

Fire resistance ----- UL94

Notes

ALL IN ONE BOX!
