

PLATFORM SCIENCE NAVIGATION

Navigate Confidently and
Safely with PS Navigation

Empower your drivers and back-office staff with PS Navigation: a simple yet powerful application designed to enhance safety and boost efficiency.

GET TO YOUR DESTINATION WITH EASE

Say goodbye to the hassle of navigating unfamiliar roads. Our one-touch navigation system provides turn-by-turn directions, lane guidance, real-time traffic updates, and weather alerts, making it your reliable companion on every journey.

STAY SAFE AND SECURE WITH TRUCK-SPECIFIC ROUTES

Our routing technology considers your trucks' unique specifications—including height, weight, length, axle count, and hazmat hauling—to ensure your drivers always take the safest and most efficient routes.

AVOID TRAFFIC JAMS AND DANGEROUS ROADS

Mark roads as "no-go" zones to steer clear of rush hour traffic and ensure a safer, more efficient driving experience.

CUSTOMIZE EVERY STEP OF THE WAY

PS Navigation's custom points of interest feature allows you to easily add important locations, such as loading docks or fuel stations, to your route for faster, more cost-effective trips.

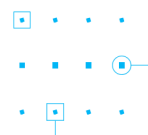

OPTIMIZE YOUR ROUTES WITH DATA-DRIVEN INSIGHTS

Powerful analytics help you make the most of your trip data—including average speed and miles traveled—and provide insight to continuously improve your routes over time.

STAY ON TOP OF YOUR CLOCKS

Running out of drive time? PS Navigation's integration with Hours of Service helps drivers stay aware of upcoming breaks and makes adding stops to their trips easy.

Connect with us to see PS Navigation in action and learn how we help your fleet stay safe and efficient on the road ahead

PS NAVIGATION

Feature Spotlight

WIFI MAP DOWNLOADS AND UPDATES

Stop using your data to download maps—use WiFi instead. The WiFi Assist feature enables drivers to download large map updates over a fleet-approved WiFi source while on break.

ROUTE HISTORY

After a route is completed, you can review the trip's metrics in your Platform Science User Portal. In addition to tracking the average speed and miles traveled, you can compare the planned route to the actual trip taken.

PRE-TRIP ALERTS

Keep your drivers in the know with pre-trip HOS and traffic alerts that show them what's coming around the bend so they can be prepared for the road ahead.
