BabyFloki

# Vision

To provide investors with a reflection meme token that offers reasonable taxes (approx. 11% buy and 13% sell) and a value project that is designed to stand the test of time by harvesting the established social and crypto world influence of Elon Musk and his new Shiba Inu pup Floki.

# About

BabyFloki is the latest in the Shiba Inu inspired collection of meme tokens, which combines Elon Musk's influential Shiba Inu puppy called Floki and the iconic \$DOGE paid out to BabyFloki holders. A long-time supporter and spokesman for technological innovation and cryptocurrency, Elon is an acknowledged trendsetter and his new pup tweets will send BabyFloki to the moon!

BabyFloki is a reflection token that rewards investors in 2 ways:

- ➡ by consistently increasing its market cap (and individual token price) thanks to a strategically sound and sustainable marketing plan
- ➡ by rewarding BabyFloki token holders with auto distributed passive income paid out to their wallets in \$DOGE tokens

# GOALS

1

To become an established name in the Shiba Inu meme token space by harvesting the power of the hottest trends and the biggest influencers in the crypto world today

2

To give holders an opportunity to diversify their portfolio and to earn passive income by paying out rewards in \$DOGE

3

In doing so to create a sustainable, profitable and transparent investment opportunity for the BabyFloki community and holders

# Why BabyFloki?

The answer is astonishingly simple: in the current crypto space there are THOUSANDS of new projects but only ONE Elon Musk. Famous for his long-running association with Dogecoin, the self-proclaimed 'Dogefather' now has an adorable Shiba Inu pup of his own called Floki. Floki is sure to continue to feature in Elon's tweets and \$BabyFloki will harvest the power of those precious tweets for the benefit of our token holders. Riding the waves made by one of the most influential people in the crypto space is at the core of our marketing strategy. This powerful and free marketing will be supported by focused online activity:

- ➡ tactical campaigns/influencer partnerships on social media such as Twitter, Telegram or YouTube
- ➡ key high profile coin platform listings such as Coingecko and CMC
- ➡ ads and promotions e.g. on Coinhunt or Coinsniper

Further marketing plans include offline events, dog charity donations and high value giveaways.

# Why Doge?

There are 2 key reasons for choosing \$DOGE as the reward for BabyFloki holders:

Consistency is key for any successful brand. We believe that paying out rewards in Elon's favourite meme coin \$DOGE enhances the link between the tech billionaire favourites and BabyFloki token and it allows further opportunities for marketing activities to build upon those connections.

Dogecoin is a household name in the meme token space due to a long-running association with Elon Musk. The self-proclaimed 'Dogefather' is said to have a large holding of \$DOGE and we believe this fact itself promises a bright future of \$DOGE in the crypto space. Elon's ability to send Dogecoin prices to the moon with a single tweet is an additional incentive!

# Why BSC?

Binance Smart Chain is one of the leading platforms for tokens.

The key difference between BSC and alternatives such as Ethereum Smart Chain is the blockchain fees. Those fees are incurred when users conduct a transaction on a blockchain.

This fee is collected by miners or validators for ensuring that only valid transactions are recorded and processed on the blockchain. A multitude of transactions can result in high fees. For example, Ethereum has recently recorded fees over \$100 for a single transaction. At the same time Binance Smart Chain charges range between \$0.10 — \$0.50 for the same services.

Another important factor to consider is transaction speed. Ethereum is affected by scalability challenges, which cause congestions on the blockchain and results in long waiting time and/or higher fees. The Binance Smart Chain addressed those scalability problems and it allows easy implementation of smart contracts to build scalable dApps.

# TOKENOMICS

BUY || REWARDS: 2% LIQUIDITY: 2% MARKETING: 6% SLIPPAGE 11%+

SELL || REWARDS: 4% LIQUIDITY: 2% MARKETING: 6% SLIPPAGE 13%+

**Token:** BABY FLOKI - **Ticker:** BABYFLOKI
