Studios

Welcome to Cybrary Studios,
home to Cybrary's podcast series!

Including the award-winning 401
Access Denied, voted Best
Cybersecurity Podcast for NORTH
AMERICA by the 2021
Cybersecurity Excellence Awards

Introduction

The Cybrary Podcast was started out of a genuine interest in the cybersecurity industry and set out to make it more approachable for everyone. We started by interviewing industry leaders and experts to get their stories on how they started and what excites them most. As we continued we interviewed recruiters, HR Execs, and fellow startup companies to get their unique perspective on the industry and to provide a well rounded and entertaining show for our listeners. We have since expanded our Podcast to include 401 Access Denied, a show that we Co-Created with Thycotic focusing on thought leadership in the cybersecurity field. This Media Kit provides an overview of our podcast series, hosts, guests and highlighted episodes. The episodes themselves cover a variety of topics such as DevSecOps, Recruiting, Entrepreneurism, OT Security, and more. The Cybrary Podcast and our other series are available not only on Apple Podcasts, YouTube, Spotify, and Google Podcasts, but also on dozens of additional podcast directories.

Podcast Series

The Cybrary Podcast

In this show, we will be speaking with current leaders and experts in the IT and Cybersecurity fields. Discussing topics ranging from DevSecOps and Ransomware attacks to diversity and the retention of talent, the Cybrary Podcast covers it all. Stay up to date with recent discussions and insight from industry leaders, current vendors and instructors from Cybrary. Come join us at Cybrary and get to your Next Level today!

Podcast Series

401 Access Denied

Want authorized access to top security tips from the experts in InfoSec? Join the 401 Access Denied Podcast Bi-weekly, with Thycotic's ethical hacker Joseph Carson and Cybrary's VP of Engineering Mike Gruen, as they share life lessons and insights into the world of InfoSec – the good, the bad, and the ugly. Whether you want to learn more about the latest hacking techniques, or navigating how to become a CISO, this is the podcast for you.

Podcast Hosts

Jonathan Meyers

Jonathan Meyers is the Head of Infrastructure at Cybrary where he is responsible for designing, maintaining, and securing all corporate infrastructure including their Security Enablement platform supporting over 200 companies and over 3 million users worldwide. He previously worked as a Senior DevOps and Senior Operations Engineer at Forcepoint (formally RedOwl Analytics prior to their acquisition) where he oversaw the operations and deployment of their hosted and on-prem UEBA/E-Surveillance product. Jonathan holds an Information Technology degree from The United States Military Academy at West Point.

Podcast Hosts

Joseph Carson

Joseph Carson is a cyber security professional and ethical hacker with more than 25 years' experience in enterprise security. Joseph is a Certified Information Systems Security Professional (CISSP), active member of the cyber security community and advisor to several governments, critical infrastructure, financial, transportation, and maritime industries.

Podcast Hosts

Thomas Horlacher

Thomas Horlacher is the Digital Media Producer for Cybrary where he is responsible for the production aspect of Cybrary's courses and podcasts. He previously worked as a Software Development Engineer at Forcepoint and previous to their acquisition, the IT Administrator for RedOwl Analytics. Thomas holds a B.A. in Radio, Television, and Film from the University of North Texas.
