Task Force Vision and Goals

Vision

The vision for the South River Forest and Public Safety Training Center Community Task Force is to contribute to the policymaking for a safe, equitable, and inclusive environment that provides comprehensive training for all public safety professionals and encourages public interaction with the site.

Goals

The goals for engagement are to:

- Create inclusive and community-driven recommendations for the surrounding green space (300 acres) and the public safety training curriculum.
- Facilitate an inclusive engagement process that incorporates the aspirations and expertise of the Atlantan community.
- Provide opportunities for fact-based education and awareness of the public safety training center and surrounding green space.
Group 1: Parks & Greenspace
Develop programming for passive and active uses of the land, while preserving its natural ecology

Group 2: Police, Fire, and E911 Curriculum
Provide input on the collaborative potential and direction of the public safety curriculum

Group 3: Sustainability & Resilience
Introduce and encourage the use of best practices with regards to infrastructure and development

Group 4: Visioning, Memorializing, and Repurposing the former Atlanta Prison Farm Site
Contextualize the future best use of the Atlanta Prison Farm Site given its history
Expectations

- Engagement activities are centered around the planned development of the site
- Recommendations will be delivered to the Mayor’s Office, but all may not be implemented
- Task force members are representatives of their community of influence
- The Task Force is focused on the 300 acres surrounding the Public Safety Training Facility site
- Only selected Task Force members are to participate in the activities
Rules for Engagement

Be Respectful of Others

Be Present; No Substitutions

Silence Cellphones

One Conversation at a Time

In Absence, Review Materials & Provide Comments
Subgroup Meetings

Meeting 1: Inform and Early Visioning

Meeting 2: Final Vision and Early Recommendations

Meeting 3: Preliminary Recommendations

Meeting 4: Refine & Prioritize Recommendations

Meeting 5: Review & Vet Final Recommendations
Development

Context
THE ATLANTA POLICE FOUNDATION
PUBLIC SAFETY TRAINING CENTER
LEADERSHIP INSTITUTE AND ACADEMIC BUILDING

Project Overview, June 2023
-61% optimization

Modeled as “Police Station”
Most impacted by:
- Orientation
- Roof construction
- HVAC efficiency
$42,638/year in operational savings if the building is optimized.

Design case - 44% Optimization

Modeled as “School/Univ” Most impacted by:
- HVAC efficiency
- Roof construction
- Plug loads
ACADEMIC BUILDING – Daylighting – Level 2
The project team assessed site conditions before design to evaluate sustainable options and inform decisions about site design.

They then completed and documented a site survey including:

- Topography
- Hydrology
- Climate
- Vegetation
- Soils
- Human Use
- Human Health Effects
SSC2: PROTECT AND RESTORE HABITAT

- The projects conserved existing natural areas and restored damaged areas to provide habitat and promote biodiversity.
- The project site will preserve and protect from all development and construction activity 83% of the greenfield area on the site.
- AND
- Restore 35% of total disturbed area with native and/or adaptive vegetation and restored soils.
The project creates exterior open space to encourage interaction with the environment, social interaction, passive recreation, and physical activity.

By providing accessible outdoor space for 52% of total site area, 93% of which will be vegetated.
SS C6: LIGHT POLLUTION REDUCTION

The project has a site lighting design that intentionally eliminates light pollution from escaping the property, improves nighttime visibility, and reduces impact on wildlife by specifying site lighting that has proper mounting heights, installation location and orientation, as well as complies with backlight, uplight and glare (BUG) ratings that are recommended based on the specific lighting zone designation of the site.
The team has studied photometric plans for the site lighting in order to maximize site lighting reduction within the LEED project boundary and outside of this area.
Intent: Reduce outdoor water consumption.

The landscaping for the project has been designed with native species which do not require permanent irrigation, beyond the two year temporary establishment period.
**Intent:** To reduce the environmental and economic harms associated with fossil fuel energy by increasing self-supply of renewable energy.

The two buildings will include on-site renewable energy systems, consisting of rooftop solar panels, to offset the greenhouse gas emissions from 28% of the building’s annual energy use.
• The project will help reduce pollution by promoting alternatives to conventionally fueled vehicles by installing day one, EV charging equipment as well as additional electric vehicle infrastructure for future implementation of EV charging stations, throughout the campus.
Vision Process
Recommendation “Bucket” – Sustainability and Resilience

Quality of Life: improve the well-being for individuals and communities

Infrastructure: develop and improve systems and structures that support sustainable functioning

Retention: preserve and protect valuable resources, including natural, cultural, and human assets
Recommendation “Bucket” – Sustainability and Resilience

Live Well
recommendations pertain to practices and opportunities that improve quality of life

Infrastructure
recommendations influence the built and cultural environment, current and future, on and around the site

Retention
Recommendations maintain and improve the existing site conditions by integrating services, systems, and tools to harness site potential
## Recommendation “Buckets” – All Groups

Recommendations Exercise – Instructions

In your breakout groups, you will interact with the previously drafted recommendations for all three buckets.

1. Review the recommendations and make edits to their current form
2. Add recommendations
3. Vet all recommendations with subject matter experts
4. Prioritize recommendations
5. Share major edits and new recommendations with the larger group for discussions

Spokesperson will report on reprioritizations, new recommendations, and major edits
03 Review Preliminary Recommendations
Activity Recap
1. Reviewed the preliminary recommendations from members of the task force
2. Prioritized all recommendations within each bucket
3. Developed new recommendations under each bucket
04

Implementation
Exercise
1. Join the exercise on Mentimeter. Question will only allow one (1) response per user
2. Answer the following questions:
   - What is the best approach to communicate recommendations to the community/public?
   - How should the community continue to be engaged as the project is implemented?
   - Who are potential partners you envision participating in future implementation?
3. Review responses live and discuss
Next Steps

• Week 5 – Share and Vet Recommendations
