WORLD CLASS SHADING SYSTEMS

ECLIPSEAWNING.COM

THE PERFECT ADDITION TO YOUR OUTDOOR LIVING DECOR

THE ECLIPSE PREMIER

Improve on a Classic

The Eclipse Premier takes our most popular model, the Eclipse unit, and upgrades many key frame components for smoother operation and a sleeker look. The heavy duty aluminum torsion bar, next generation arms, along with redesigned, stronger arm shoulders allow the Eclipse Premier to combine European cutting edge performance with an American classic. The Eclipse Premier also includes our Platinum Protection Warranty at no additional cost.

BUILT TO YOUR SPECIFICATIONS

Eclipse offers a complete line of retractable shading systems for your home or business. Our “green” products will reduce your cooling costs, expand your living space and add style and color. Eclipse shading systems are individually crafted to meet your unique and specific shading needs – with virtually millions of combinations; no two units we produce are the same.

Your independent Eclipse dealer is a shading expert who will design and install products that are both beautiful and functional. We assemble our products right here in the USA using the finest components from around the world. Using state-of-the-art equipment and the latest technology, our skilled craftsmen and assemblers build every unit from scratch typically in less than 7 days from the date of order. This express production schedule allows your Eclipse dealer to normally install your awning within 3 weeks or less.

THE ECLIPSE

Uniquely Designed And Built To Meet Your Needs

Every Eclipse shading system is custom made and professionally installed to meet your unique needs. The Eclipse is an ideal solution to expanding the living space of virtually any deck, patio or terrace. The Eclipse features a 10 year frame warranty and is our most versatile shading system.

THE TOTAL ECLIPSE

When Bigger And Better Is Just Right For You

The Total Eclipse offers unequaled strength and durability for both residential and commercial use. The Total Eclipse, which carries a lifetime frame warranty, features unit components that are up to 50% larger than our Eclipse system and can project up to 16'6" – the largest in the industry!

THE NEXT GENERATION IN SHADING

THE ECLIPSE DROP ARM

Reduces Cooling Costs And Sun Glare

The Eclipse Drop Arm shading system is ideal for windows, porches or any opening where you desire to stop direct sunlight. The Eclipse Drop Arm will reduce interior fading & cooling costs while adding privacy and style to your home. When not in use or when warming sunlight is desired, the Eclipse Drop Arm is fully retractable. No seasonal take down needed like traditional style window awnings. The Eclipse Drop Arm comes with a 10 year frame warranty.

ECLIPSE E-ZIP

The Eclipse E-Zip retractable shading system provides easy, touch of a button control for expanded living space. Your custom made, professionally installed shading system will provide on-demand control of the sun's glare and harmful UV rays.

Your E-Zip units can also control rain and wind from entering your porch or patio area. The Eclipse E-Zip, a side retention track screen, will allow you to create a virtually bug proof environment with a touch of a button.

HD SCREENS

Maximize Your Energy Savings

Exterior mounted screens greatly reduce solar heat gain by stopping the effects of the sun before they enter the home, lowering room temperatures up to 20 degrees! Eclipse screens will also add privacy and security to any location. Eclipse screens are fully custom made in a wide variety of fabrics and options to best fit your unique needs. Most Eclipse exterior screens incorporate an aluminum extruded cassette housing which stores the fabric when retracted, allowing full access through the opening. Depending on your mounting services, these units can be installed with side tracks, cables or a combination of both to guide the hem bar and fabric.

INTERIOR ROLLER SHADES

Retractable Sunglasses For Your Windows

Eclipse shades are a “green” way to reduce room temperatures, save energy, eliminate sun glare and stop the fading of your personal effects. Eclipse offers several models of interior mounted retractable shades that can be manually operated or motorized. For maximum efficiency, electronic light and temperature sensors can be incorporated. Eclipse shades feature GreenGuard® certified fabrics that are ideal for any residential or commercial location.
