

How many trees will be removed and what sizes are the trees?

This project is the first phase of the clearing of this property.

At this time we are looking to have all mesquite trees and underbrush cleared and any additional clearing will be determined through the next phase.

If you need access to the property please give Brenda Tarpley at the Jacksboro EDC office a call at 940-567-3151.

Can the brush be burned onsite?

Brush may be burned onsite if there is not a local burn ban in place at the time of removal.

A Burn Permit must be acquired through the City of Jacksboro, at the contractor's cost.

It is the Contractor's responsibility that all local/county burning regulations are followed.

As with all of the work related to this job, the City of Jacksboro and the Jacksboro Economic Development Corporation are to be held harmless from and not liable for any and all damages that may result from said burning.
