

Unlock doors with your phone

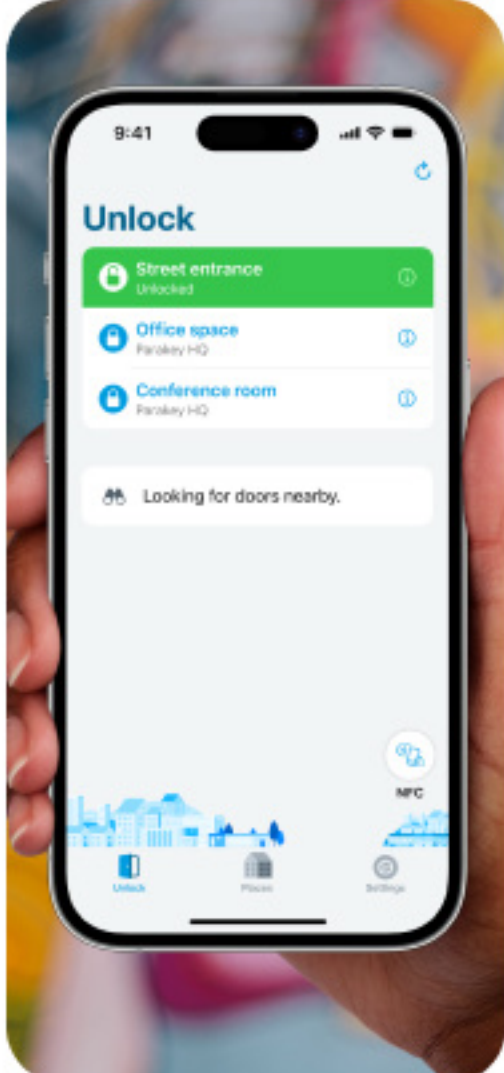

The Nordic region's largest supplier of mobile access

Parakey is a robust and secure all-in-one solution for managing mobile keys at large as well as small scale.

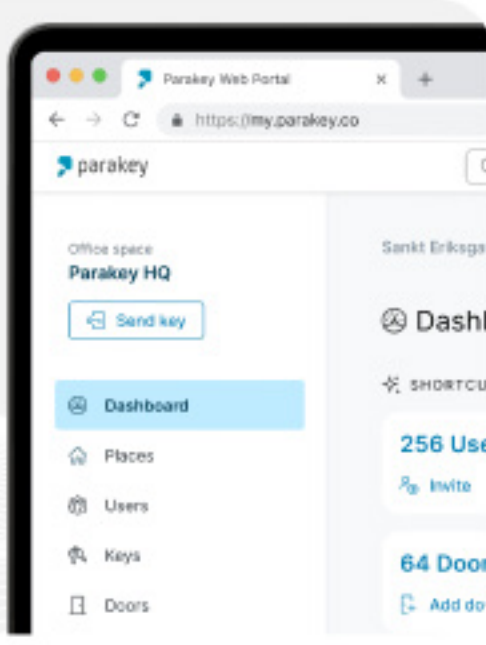

The solution consists of a cloud service, integration possibilities, apps, and hardware to securely open locked spaces such as offices, conference rooms and garages.

“In Parakey, we have found a solution that ensures that with the right mobile access, you will always get in to our properties, even without internet connection.”

– Calle Wettergren Henriksson

Parakey App

Use your smartphone as the key to locked spaces.
Send and receive mobile keys in seconds.

Unlock with your smartphone

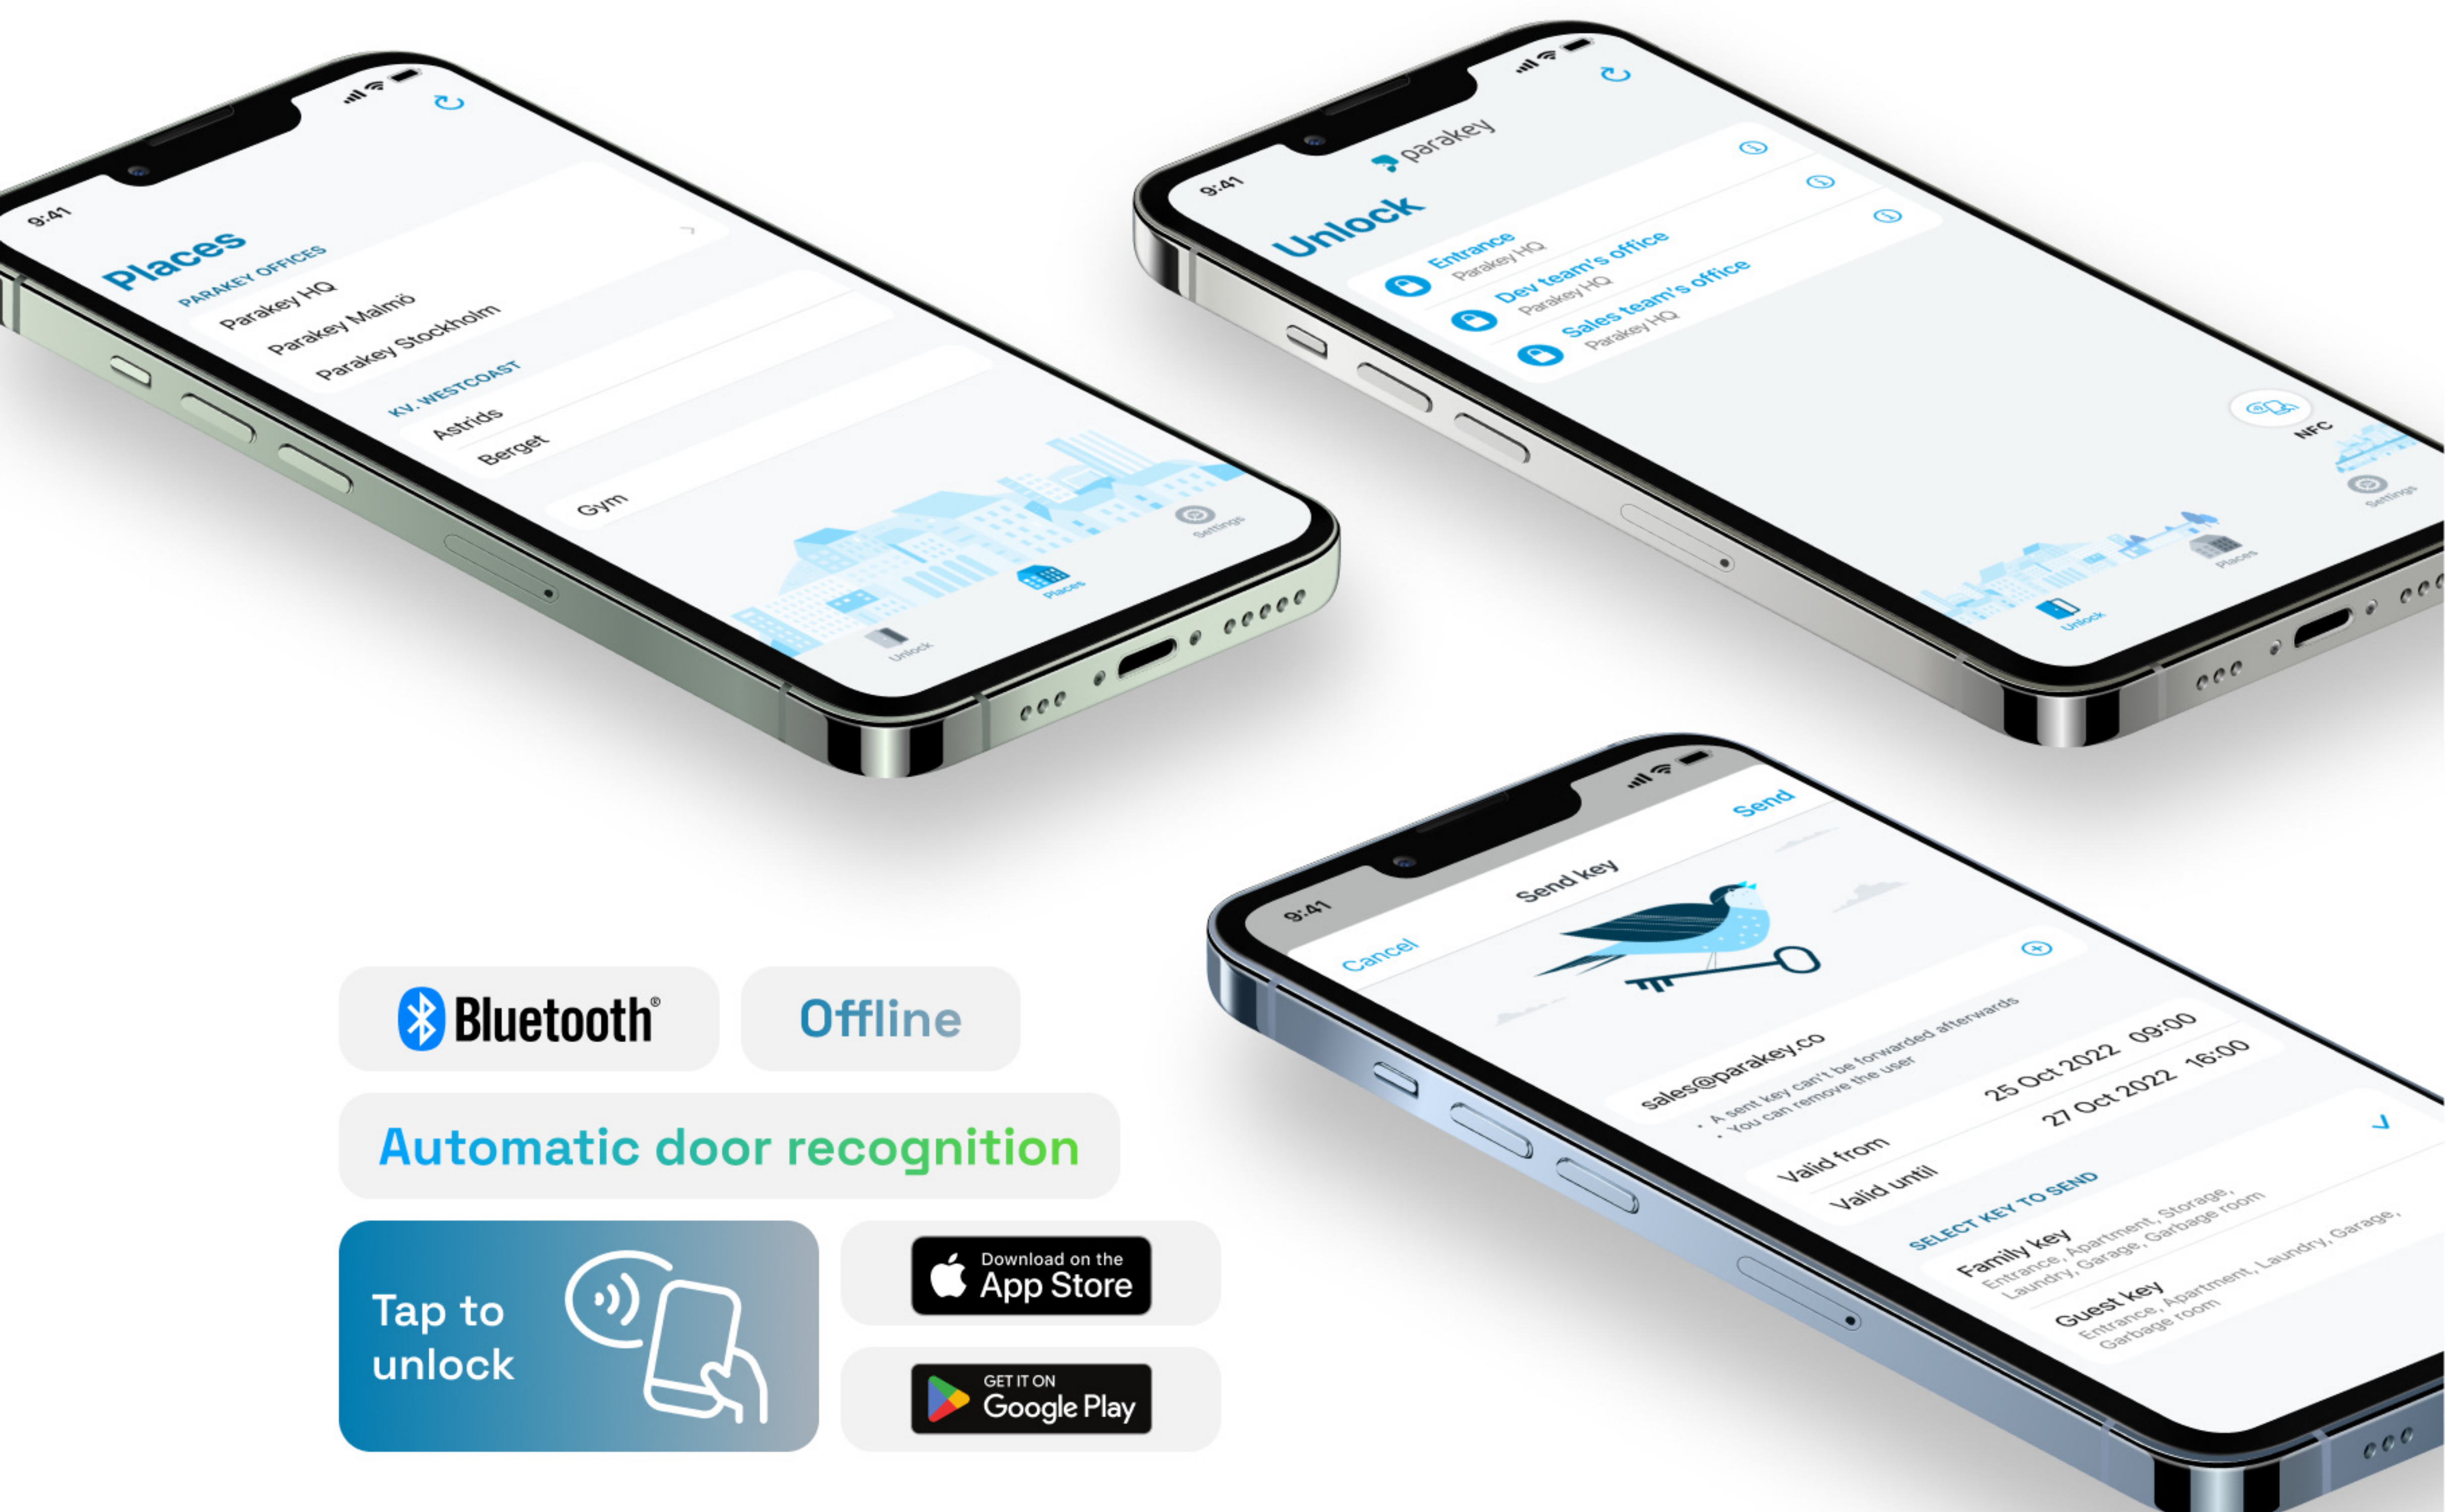

Let go of keys, fobs and entry cards – unlock with the Parakey App for iOS and Android.

Always get in, even without internet

Robust and secure – unlock with your phone even without internet connection, which could be the case in garages for example.

Send keys directly from the app

Send mobile keys to contractors, colleagues, or friends coming to visit – directly from the app.

Parakey Cloud Service

Intuitive web portal and incredible integration possibilities for automated access management.

Easily manage access in the cloud

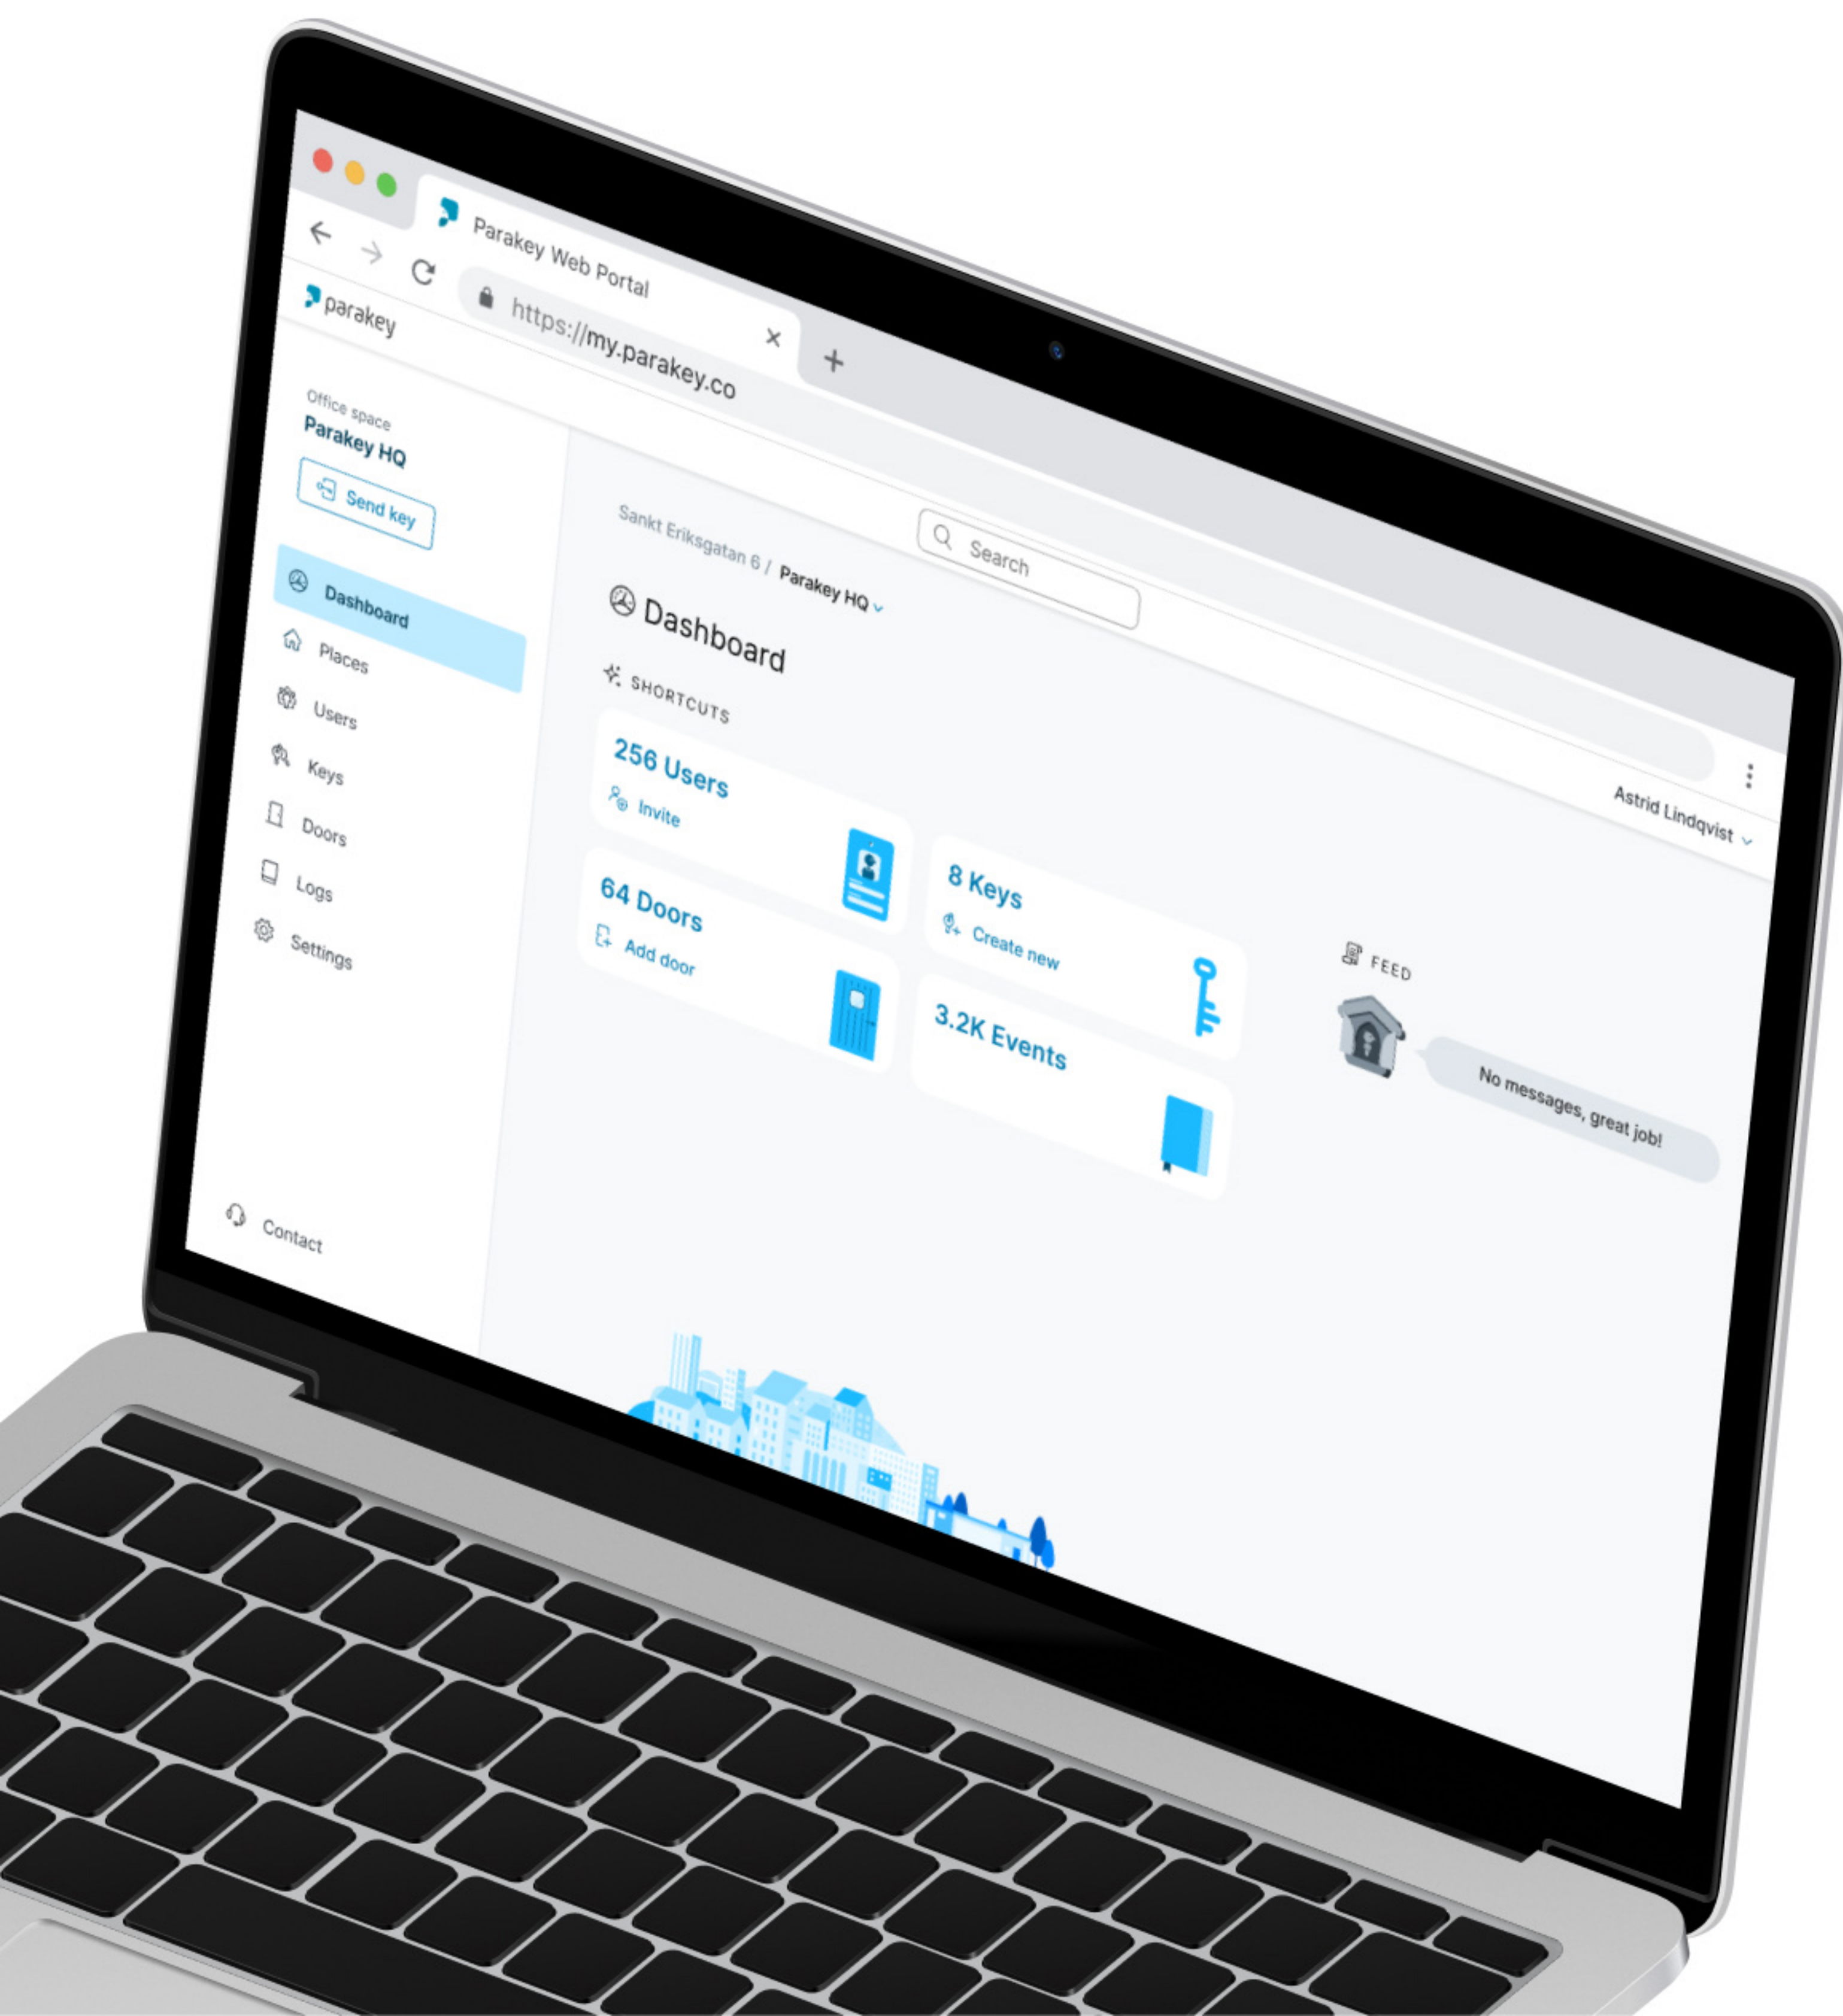

Manage mobile keys for all types of users, operations and business models, a single space or entire real estate portfolios.

Manage mobile keys remotely

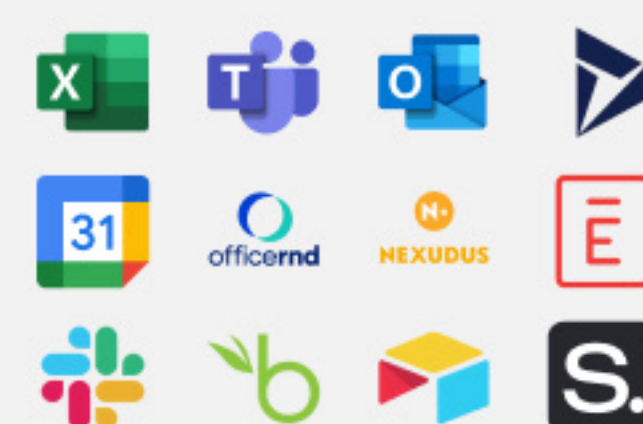

Administer who has access to which locked spaces, wherever you are. Permissions are updated in real time.

Let tenants manage their own access

Delegate admin rights to tenants for specific doors and a limited number of users.

mobile keys

Parakey Door Handle

Digital door handle with elegant design, for coworking, conference rooms and other semi-public spaces.

Enrich all doors with mobile access

Replace door handles quickly and easily, both indoors and outdoors. Simple installation without the need for electricity or internet.

The door handle is all you need

All electronics are integrated into the handle, so no connected hubs or other infrastructure is needed. Secure unlocking via Bluetooth.

Battery power → No cable installations

The handle is battery powered, which further lowers the threshold for digitalizing all doors in a property.

Parakey Cylinder

Flexible, high-quality electronic cylinder to digitalize all imaginable locks.

For everything from apts to padlocks

No more physical keys to doors and other locked areas. E.g to apartments, utility rooms, padlocks for containers and boom gates.

Everything you need is the cylinder

Quickly and easily installed where there is no internet connection or wired power. Battery powered, no need for any other infrastructure.

Robust and weather-proof

German engineering and quality meet Swedish tech and innovation in stainless steel. Weather-proof variant enables outdoor installation.

Fits all types of cylinders

Unlock with your phone

Parakey Slim

Cost efficient solution that can be used as a stand alone access control system or to enrich traditional systems.

World's smallest access control system

Parakey Slim is so small that it fits anywhere, even behind an exit button or in existing systems' door control units.

Modernize existing systems

Never before has the threshold been so low to enrich traditional access control systems with mobile access. Turn off security alarm at first unlock.

Next generation security

Supports OSDP 2, a standard for encrypted communication between modern systems and locks.

Offline

Parakey Control Unit

Used in more sophisticated door environments and cases that require extra long range for example.

Control all types of electric locks

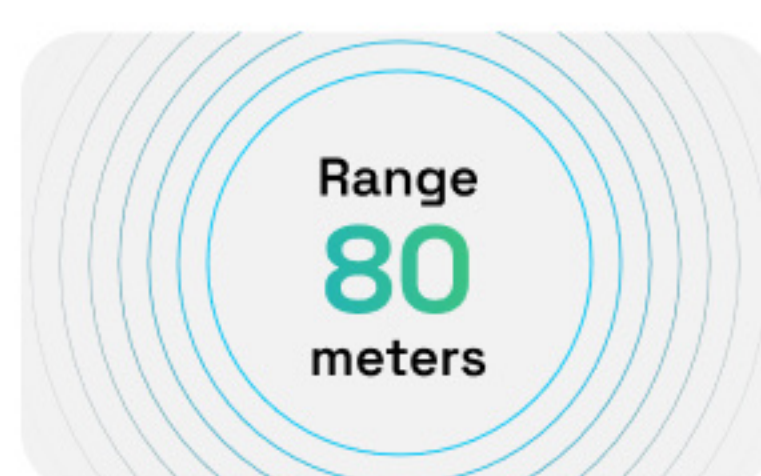

Parakey Control Unit can control all types of electric strikes, motor locks, solenoid handle locks, electromagnetic locks etc.

The market's longest range

Parakey Control Unit is equipped with an extra signal amplifier that increases the range to up to 80 meters in line of sight. Perfect for garages.

Turn off security alarm at first unlock

Connect your security alarm to Parakey Control Unit to turn it off when the first person unlocks the office.

Scheduled unlock

Offline

Parakey PDL

Professional Digital Lock for coworking, utility rooms, conference rooms etc.

Different ways to unlock

Unlock with smartphone app or the existing physical key.

Battery powered

One battery lasts up to 30 000 unlocks during more than two years. No need for wired power to the door.

Everything fits in the lock

All functionality and tech is integrated in the lock. Leads to quick, hidden, vandal-proof installation.

SSF 3522 Class 3
