

ECO ONE®

PLANT BASED PRODUCTS

Introduction

ECO ONE® has a clear vision: To create a healthier planet by reducing singleuse and short-term use plastics.

ECO ONE® designs, develops and manufactures 100% plant-based fiber packaging solutions that aim to be biodegradable, compostable, and recyclable. We make it easy for companies to switch out of plastic to preserve our future.

Materials & Process Technologies

- 100% Plastic-Free Packaging

Why you should care

Better for Human Health

Showcase your commitment to protecting your customers' health.

Earth Digestable

PFAS-Free fiber and oil-barrier coatings are 100% bio-based fiber

Engineered to Perform

ECO ONE® fiber has proven durability and provides a superior consumer experience.

Manufacturing

Our manufacturing capabilities set us apart as a leader in environmentally friendly food packaging solutions. Here's what makes us stand out:

- **State-of-the-art Facilities:** Our manufacturing facilities are equipped with cutting-edge technology and adhere to the highest industry standards, ensuring efficient production processes and consistent product quality.
- **Sustainable Materials:** We prioritize the use of sustainable materials, such as biodegradable and compostable options, recycled materials, and renewable resources. By leveraging these materials, we significantly reduce the negative impact on the environment.
- **Cost-Effectiveness:** We understand the importance of cost-effectiveness for our clients. Our manufacturing processes are optimized to deliver environmentally friendly food packaging solutions without compromising affordability, allowing businesses to adopt sustainable practices while staying within their budget.
- **Custom White Labeling:** We offer the flexibility of custom white labeling, allowing businesses to showcase their brand identity on our environmentally friendly packaging. With our expertise and state-of-the-art printing capabilities, we can create packaging designs that effectively represent your brand and attract consumers.

- **OEM Packaging:** We also provide OEM (Original Equipment Manufacturer) services, enabling businesses to create customized packaging solutions tailored to their specific requirements. Our experienced team collaborates closely with clients to develop and manufacture packaging that aligns perfectly with their brand values and product offerings.
- **Quality Control:** We prioritize quality at every stage of the manufacturing process. Stringent quality control measures are implemented to ensure that our environmentally friendly food packaging meets the highest standards of performance, durability, and safety.
- **Scalability:** Our manufacturing capabilities are designed to accommodate various scales of production, from small-batch orders to large-scale operations. Whether you're a startup or an established enterprise, we have the capacity to meet your packaging needs efficiently and effectively.

With our advanced manufacturing processes, commitment to sustainability, and ability to provide custom white labeling and OEM packaging solutions, we are the ideal partner for businesses seeking environmentally friendly food packaging that is cost-effective, sustainable, and minimizes negative environmental impact.

Our Mission

ECO ONE® is a company dedicated to creating environmentally friendly and sustainable packaging solutions for businesses of all sizes. Our flagship product line, RenewABowls®, offers a range of eco-friendly bowls made from recycled and biodegradable materials.

At ECO ONE®, we believe that it is possible to have both sustainable and convenient packaging, and our goal is to provide our customers with high-quality products that meet their needs while also being gentle on the planet. We use only the most eco-friendly materials in our packaging, including recycled and biodegradable plastics, recycled paper, and plant-based materials.

Our RenewABowls® line is perfect for businesses in a variety of industries, including food service, retail, and industrial. These durable and attractive bowls are a great choice for companies looking to reduce their environmental impact and make a positive contribution to the planet.

In addition to our RenewABowls® line, we also offer custom packaging solutions to meet the specific needs of our customers. Whether you need packaging for retail products, food, or industrial materials, we have the expertise and resources to create a solution that works for you.

Thank you for considering ECO ONE® and our RenewABowls® line for your packaging needs. We look forward to working with you and helping you make a positive impact on the environment.

Our vision

At ECO ONE®, our vision is to revolutionize the food packaging industry by providing innovative, environmentally friendly solutions that prioritize sustainability, cost-effectiveness, and a reduced ecological footprint. We are committed to leading the way in transforming how food is packaged, ensuring a brighter and greener future for generations to come.

With a deep understanding of the pressing environmental challenges we face today, we strive to offer packaging solutions that go beyond mere functionality. Our products are meticulously designed to minimize negative impacts on the environment while delivering unparalleled performance and cost savings to our valued customers.

By embracing cutting-edge technologies and sustainable practices, we aim to be the go-to partner for businesses seeking packaging solutions that align with their sustainability goals. We believe that by making conscious choices at every step of our operations, we can contribute to a circular economy and reduce waste generation.

At the core of our vision is the belief that environmentally friendly food packaging should not come at the expense of affordability or convenience. We continuously explore new materials, processes, and designs to ensure that our products meet the highest standards of sustainability without compromising on functionality or customer satisfaction.

With our environmentally friendly food packaging, we envision a world where businesses can thrive while minimizing their ecological footprint. Together, let's create a future where sustainable packaging is the norm, benefiting not only our planet but also the bottom line of businesses worldwide. Join us on this transformative journey towards a greener, more sustainable future.

Revitalizing Earth, Empowering Lives

Our products address critical challenges affecting our planet and human health:

- **Long-Term Threats:** Plastic and "forever chemicals" pose significant risks to our food, planet, and well-being. We combat these risks effectively.
 - **Oceanic Imbalance:** By 2050, plastic pollution will surpass marine life weight. Our sustainable alternatives promote a healthier marine ecosystem.
 - **Human Health Impacts:** Toxic chemicals in plastic lead to infertility and increased cardiovascular disease mortality. Our alternatives minimize exposure. Rising Endocrine Disorders: Increasing toxic chemicals cause escalating endocrine system disorders like Type 2 Diabetes. Our solutions reduce risks.
 - **Protecting Future Generations:** Plastic toxins contribute to Gestational Diabetes, affecting newborns' health. Our packaging safeguards their well-being.
 - **Challenging Replication:** Replicating plastic's properties with PFAS-free, plant-based alternatives is difficult. Our sustainable solutions maintain functionality.
 - **Credible Alternatives:** We offer reliable fiber-based alternatives to traditional plastics, meeting the demands of environmentally conscious businesses and consumers.
 - **Microplastic Contamination:** Microplastics pervade air, water, and food chains, endangering ecosystems and human health. Our products help reduce contamination.
- We're dedicated to creating a positive impact on the planet and human health through tangible, sustainable packaging solutions. Join us in building a healthier and resilient future.
