- Raise Indoor Air Quality Standards

WHAT WE OFFER

- Free Indoor Air Quality Assessment
- Asthma Mitigation Techniques
- Installation of Air Monitors
- Real Time Air Monitoring Data
- Green cleaning education
- A community network of clean air enthusiasts

Asthma is a significant health concern in Detroit, Michigan. According to current data from , the prevalence of asthma in the city of Detroit is 74% higher than that of Michigan as a whole. Asthma affects 24.8 million Americans, including 5.5 million children, and is the leading cause of emergency room visits in children. This is why we must take action! Let's give our children an equal chance at a healthy environment.
