

Deliver more value and build stronger client relationships

Why Partner with Spekit?

Don't leave your clients high and dry. Use Spekit to maximize user adoption and ensure successful software implementations.

Minimize time-to value for clients

Setup Spekit in 5 minutes with our one-click integration. Customize our out-of-the-box training content on common solutions like Salesforce, CPQ, Lightning and more.

Impress clients with that “wow” factor

Instead of a one-time training or a long training manual that goes stale after days, leave behind an easy-to- manage in-app training solution that supports them as they grow.

Scale training across multiple clients

Easily customize and reuse all of the incredible documentation you've already built with a few clicks in Spekit to get started in minutes.

Drive revenue with managed services

Offer Spekit as an add-on to your existing packages for additional revenue opportunities around end-user support, change management and adoption.

How does it work for Partners?

Partner with Spekit, the SaaS in-app learning platform, to help your clients effortlessly drive adoption and change management

1

Contact us for your free Spekit Account

Customize our free content or create your how-to's, step-by-steps, acronyms and more you can reuse across clients.

2

Set up new client account in 5 minutes

Import the training of your choice from your Spekit account into new org.

3

Customize training to their needs

Document any objects, fields, picklists of your choice.

4

Automatically see training in-app

Our Chrome extension automatically surfaces the training where it belongs in Salesforce or any app.
