

CUSTOMISED RUBBER LINING MACHINES

OPTIMISE YOUR PRODUCTION WITH INNOVATIVE SOLUTIONS

- Large-scale production
- Designed for cleanroom usage
- High accuracy and careful handling
- Colour control and secure sampling
- Durable quality and long lifetime

REINVENTING EFFICIENCY

Our advanced rubber lining machines are built to match your specific production needs. You get a solution based on more than 40 years of experience with making tools and machines that push the boundaries of what is possible. Seemingly impossible challenges are our speciality.

- 1,150+ caps per hour
- 165 strokes per minute
- 5-7 cavities
- Compact size
- Low-noise operation (below 68 dB)

TRUSTED BY THE MEDICAL INDUSTRY

Major players in the medical industry rely on the high performance and high degree of precision Gruber machines offer. Regardless of the industry, we can also provide special-engineered machines to optimise your production.

PREMIUM-CLASS SERVICE

For all custom-built machines, we recommend a Gruber service agreement. Our skilled service personnel will provide the best care for your machinery to ensure the continued smooth running of your production.
