

Bulk Property Data

A nationwide solution that provides essential residential property information at scale without the hassle.

Empowering Informed Decisions

Data Quality

High-quality, multi-sourced data that is fully normalized for improved accuracy and timeliness.

Standardized Delivery

Receive data monthly via a flat csv for **easy extraction and integration** into your applications and workflows.

Efficient Access

Access comprehensive **property data in bulk**, specifically designed to support you and your business.

How It Works

HouseCanary Bulk Property Data simplifies access to property information by offering a **standardized delivery of property characteristics** that have been triangulated from multiple sources using **HouseCanary's proprietary data cleansing and normalization pipelines**. We've done the hard work so you don't have to, taking various property details from multiple sources and creating a **singular view of individual properties** across the United States.

Data is available as a **nationwide dataset** or on a **state-by-state basis** depending on your needs. *
