The Cultural Scorecard

Use this scorecard to determine the Corporate Culture of your organization. You can do this by asking a representative sample of your company to complete the brief questionnaire. Collect and analyze the data.

If the results indicate consensus among the group, then simply discuss the trends with your Hiring Team. Refer to this objective snapshot of your company as you search for new employees. If your results indicate disparity of three or more points, I suggest discussions within the Hiring Team. The final result should be an objective template clearly outlining the Corporate Culture of your organization.

Once you have collected this information you will be able to more clearly identify, recruit, and retain employees that will fit within your company. Taking the time to complete this exercise will reduce turnover which can lead to greater profitability and performance.
