Gt08 smart watch user manual pdf

Gt08 smart watch app. User manual smart watch. Gt08 smart watch. Smart watch guide.

1. To get the most comfort out of your smart watch, ensure that there's just enough space between your arm and the band to fit a finger snugly. 2. When putting on your smart watch, put a finger under the strap for optimal tightness. 4 Functions * 4.1: Synchronize phone and local notifications * 4.2: Set Bluetooth status to ON/OFF * 4.3: Record call history from phone, including missed calls, answered calls, received calls, and all calls * 4.4: Bluetooth dialer connects smartwatch to smartphone Page 13 * 4.16: Document management * 4.17: Music player plays local music with TF card installed or connected to smartphone * 4.18: Camera * 4.19: Audio recorder for Android with SIM and TF card Page 14 * Twitter integration (Android only) * Audio recorder * Sedentary alarm * Push notifications for SMS, phone calls, and music player * Anti-loss feature Page 15 1. Load smartwatch before use (1-2 hours) 2. Use standard charging cable; Mini USB charger for Android smartphones is compatible 3. Battery life depends on functions used; using too many apps at once will shorten battery life !!! To use Twitter on your smartwatch, you need to install a SIM card (frequencies: GSM 850/900/1800/1900 MHz). **Reminder** 1. When putting on the smart watch, leave about a finger's width between the wrist and strap for comfortable wear. **Tip** 2. Please place a finger under the strap when closing the smart watch. - Power button: On/Off, Wake-up, Shutdown, Back - USB Port: Charging and data transfer (Micro USB) - Camera: Take photos - Microphone: Audio input - Speaker: Audio output After powering on, swipe left or right to access the menu. Use Page 25 for synchronization between smart watch and smartphone. It will not consume data traffic. For Android 5.0 and earlier versions, update the sync application in a timely manner for better usage experience. - Messages: Sync local messages and phone messages - Bluetooth: Set Bluetooth status (On/Off) - Call Log: Historical calls from sync. smart phone: "Missed", "Called", "Received", and "All Calls" - Bluetooth transmitter: Connect your smart watch to a smartphone via Bluetooth The music player can play local music if you have installed a TF card, or connect to your smartphone. The camera can take photos. A SIM+TF card is required for Android devices. The device has features like Anti-smarrimento and Promemoria Sedentario that act as alarms. The Sveglia Notifica BT feature is available only on Android, requiring a separate app to be installed first. Also, for reading content from apps like WhatsApp, Facebook, or Twitter, a SIM card with specific frequency (GSM 850/900/1800/1900 MHz) needs to be installed beforehand.
