Massey Ferguson tractors have a specific pattern for their serial numbers, which indicate the date of production, factory, and unit number. The serial number format is a 9-digit code with three sets of three digits separated by hyphens. The first set indicates the birth month, day, and year in a six-digit format (e.g., 041-730 means April 17, 1930). The second set represents the plant of manufacture, while the third set shows the unit number. Some models have slightly different formats due to changes in manufacturing standards over time. The general principle remains the same: understanding Massey Ferguson serial numbers is key to deciphering essential information about your tractor.

Massey Ferguson tractors, manufactured from the late 1970s to the early 1990s, featured a range of models including the 4235, 4243, 4245, and more. These machines were part of the company's F01 series. Additionally, other notable models included the MF 4800, 4840, 4880, and 4900, with some variants produced from the late 1970s to the early 1980s. The MF 40 series was introduced in the mid-1950s and concluded its production run by the end of the decade. It's interesting to note that tractor supply company TSCO is a popular choice among farmers and agricultural professionals, as seen in this article.
