

A dark, stylized city skyline at dusk or dawn, featuring several skyscrapers. The image is overlaid with graphic elements: a series of yellow chevrons pointing right in the top left, a large red semi-circle in the top right, and a green circular overlay in the bottom left. The company logo is centered in the lower half of the image.

nusens **usa**™

WHAT WE DO

We handle "nuisances" in construction. We are a multi-trade niche contractor and we self-perform all our services. We don't sub-out! We specialize in repairing, maintaining and modifying all aspects of ICI (Industrial, Commercial, Institutional) building envelopes, including below grade.

SECTORS WE SERVE

WHAT WE BELIEVE

"Treat others the way that you wish to be treated."

Wouldn't it be nice to have someone jump when you call or step-up to the plate when a problem has occurred? We think so too!

“ PROBLEM SOLVING MEETS CONSTRUCTION ”

NO SUBBING OUT

We self-perform all of our services. This guarantees consistent quality and scheduling.

FLEXIBILITY

We work to suit your schedule even if it means working after-hours and over the weekend.

TRANSPARENCY

Constant communication and daily updates throughout every project, including digital site reports.

SAFETY

No project justifies breaking up a family. Our focus on exceeding OSHA standards is to ensure that never happens.

AFTER

BOLLARDS

We install bollards of various diameters to protect people or property where required. We use boring drills and temporary containment to ensure a quick, safe, and clean installation.

DURING

BEFORE

CONSTRUCT

BLOCK WORK

Partitions, foundations and structural walls are examples of uses for concrete blocks. We specialize in modifications, retro-fitting and new construction.

CONSTRUCT

AFTER

DURING

CONSTRUCT

AFTER

DURING

CONCRETE

Our concrete services include custom forming as well as standard items such as sidewalks, curbs, slabs and foundations. We also offer cosmetic and structural repair services.

PARAPET WALLS

Parapet walls may need to be raised in height or expanded in width. Our parapet wall construction includes intricate metal studding, wood, and masonry assemblies.

CONSTRUCT

AFTER

AMERICAN EAGLE

AE

CONSTRUCT

STEEL FRAMING

For retrofits, we install light and heavy gauge steel stud framework for a variety of wall assembly types including plywood, cement board and DensDeck. We also handle the installation of new fascia, cladding and a variety of other veneers.

DURING

BEFORE

CARPENTRY

Our craftspeople specialize in various types of carpentry such as historical restoration, rough and finished carpentry and even structural. Our services also include constructing walkways, partitions, decks/fences and even custom millwork. Our CNC routers, lathes and mills, ensure we can reproduce any profile to match existing.

CONSTRUCT

DURING

CONSTRUCT

WALL COATINGS

Protective wall coatings can restore aesthetic appeal and are generally the first line of defense in preventing moisture infiltration. We specialize in the application of various coating systems for a variety of substrates

TRAFFIC COATINGS

For proper bonding of coatings and overlays, it is important that a concrete surface has the correct Concrete Surface Profile (CSP). We use shot blasters, scarifiers and grinders to achieve the correct CSP rating specified for each manufacturer's product. We specialize in a variety of traffic, epoxy, urethane, acrylic and paint coatings.

REPAIR

FLUID APPLIED BARRIERS

Fluid-applied air barriers safeguard buildings from moisture and air infiltration, forming a seamless monolithic membrane perfectly suited for intricate wall geometries. The choice between a permeable or non-permeable air barrier depends on the specific climate and wall design.

WATERPROOFING

Our waterproofing services include all necessary excavation performed by company owned excavators and shoring boxes. We have extensive experience with deep depth and restricted access waterproofing projects required for buildings with large foundations such as office towers.

REPAIR

AFTER

MASONRY & TUCK POINTING

Weather elements and physical impacts take a toll on brick, precast and stone. Our skilled masons specialize in all aspects of masonry repair and restoration.

BEFORE

THRU-WALL FLASHING

Thru-wall flashing diverts moisture to the exterior of the wall to prevent damage. The system can be installed on brick, block, precast, and stucco walls.

AFTER

REPAIR

SEALANTS

No place is too hard to reach for replacing sealants! We perform sealant services from bosun's chairs, swing stages, and aerial lifts. Our services include: perimeter, glazing, foundation, and structural beads and joints including fire-stopping.

EXPANSION JOINTS

Also known as a movement joint, it is designed to hold structural elements together while allowing for variations caused by thermal expansion/contraction. We specialize in replacing existing expansion joints as well as new installations.

REPAIR

AFTER

REPAIR

STRUCTURAL REPAIRS

Columns, footings, and foundations may require repairs due to accidental impact or deterioration over time.

We provide turn-key solutions for repairing/replacing damaged structural elements including any necessary shoring and bracing.

BEFORE

LINTELS & OPENINGS

Creating new or modifying existing openings requires specific structural considerations including shoring, bracing and appropriate lintel and beam selection. We have extensive experience performing such modifications.

REPAIR

AFTER

DEMOLITION

We provide comprehensive demolition services for both interior and exterior projects. Our expertise covers structural, non-structural, and fixture demolition and removal. We are skilled in executing demolition work in elevated areas and confined spaces. Whether demolition is your primary requirement or an integral part of your project, count on us to handle it.

STUCCO & EIFS

Repairing damaged stucco improves the aesthetic appeal and restores the first line of defense in preventing moisture infiltration. Installation of a correct drainage plane and weeper system will improve function and longevity. We specialize in the installation and repair of various stucco and EIFS systems.

REPAIR

REPAIR

GARAGES & RAMPS

Garages and ramps come in both above and below-grade configurations, with unique requirements based on factors such as climate, load capacity, and vehicular traffic. Our expertise lies in both localized repair and complete replacement of ramps, floors and structures. To minimize disruption to vehicular traffic, we develop a traffic plan and adhere to a detailed construction schedule.

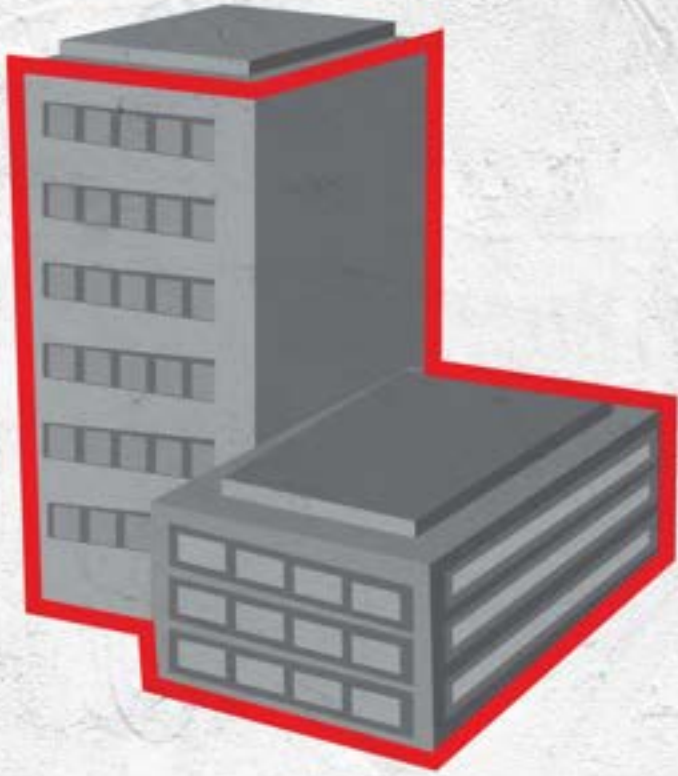

BALCONY RESTORATION

Balcony restoration can range from localized to thru-slab repairs. From the grade of structural reinforcing steel to the type of waterproofing coating, great care is taken to select products and installation methods which will ensure the longevity of the restoration.

PROTECT

WALL CONTAINMENT (WCS) SYSTEM

Wall containment systems create a secure method of controlling localized dust and debris during construction projects. We can customize the system to include knee walls, a variety of openings and negative air units.

KNEE WALLS

CUSTOM OPENINGS

CEILING CONTAINMENT SYSTEM (CCS)

Ceiling containment systems are designed to catch dust and debris which may enter a building as a result of re-roofing or other overhead construction related activities.

Nu-Cell™ is our proprietary ceiling containment system.

What sets **Nu-Cell™** apart from other containment systems?

-  Building & Fire Code compliant
-  Clear view of roof deck
-  Bio-degradable and recyclable
-  Fast installation
-  Lowest cost system

A large red circle with the word "PROTECT" written vertically in white capital letters. The circle is superimposed over a photograph of a grocery store aisle with produce displays and a ceiling containment system installed.

PROTECT

PROTECT

DEBRIS NETTING SYSTEM

(DNS)

Debris netting protects people and property from falling or blowing debris and objects. Uses include high-rise construction, scaffolding enclosures, safety fences and general site enclosures.

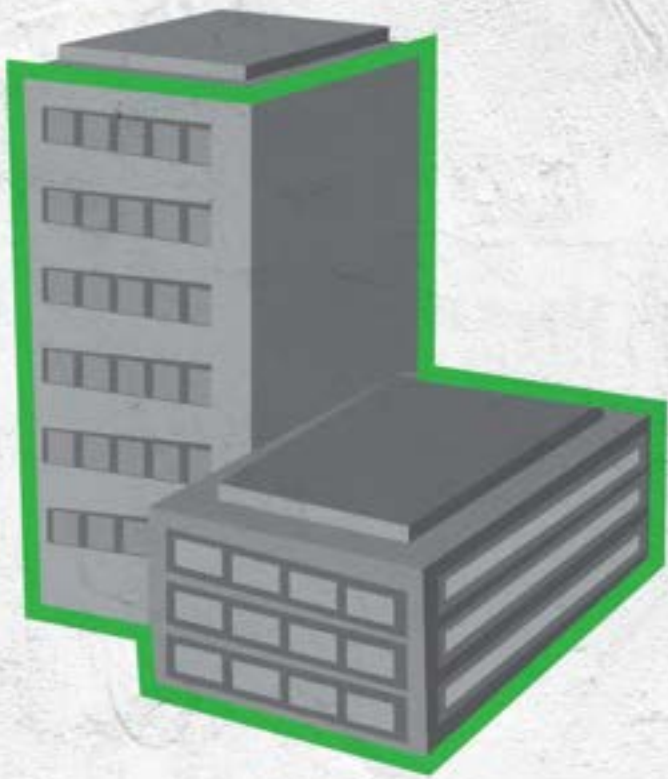

SAFETY NETTING SYSTEM (SNS)

Safety netting is designed and tested to provide protection to workers from falls. It can also be used as a heavy-duty debris containment when added to a debris netting system.

RESTORE

HIGH STRUCTURE CLEANING & RESTORATION

Site conditions and aging can lead to unsightly ceilings, roof decks, and exposed building elements with rust formation, peeling paint, and a decline in overall appearance. We specialize in high-structure cleaning and restoration for both the interior and exterior of buildings. Our services include vacuuming, blasting, degreasing, painting, coating and structural repairs.

HEAVY DUTY CLEANING & POWER WASHING

Environmental conditions as well as accidental spills can damage the aesthetics of a property. We specialize in the cleaning and removal of a variety of stains including: oil, liquid asphalt, dirt, grime, rust, efflorescence, mold and organic.

RESTORE

RESTORE

INTERIOR REPAIRS

We offer drywall, mud and sanding, painting, tiling, flooring and finish carpentry services for all of your interior repair and remodeling needs. Our work can be performed after-hours and over the weekend to minimize disruption to building occupants.

SPECIALTY PAINTING

musens

We offer painting services for those hard to reach places and for challenging environments such as windy, hot or cold conditions, including providing our own lead abatement. We have experience working in schools, hospitals, food facilities, sensitive manufacturing plants, as well as painting at heights or while suspended.
