To join a server, one must claim a hive by following a red arrow and pressing "E" on laptop/PC, "X" on Xbox, or tapping the button on tablet/iOS/Android. The player can expand their hive by buying additional slots at the Mountain Top Shop. Each hive has 6 slots, with a maximum of 50 bees in one slot. The price for expanding to this many slots is quite high. On top of the 6th hive stands a statue that rarely falls off and lands in the rightmost hive. Each bee's slot features the face of its icon in the bee's color. The background color of each slot depends on the bee's rarity: bronze (Common), white (Rare), bright yellow (Epic), aqua blue (Legendary), light purple (Mythic), green (Event). A thin yellow line traces the border if a bee is gifted, and its level changes color depending on mutations. Players can customize their hive by putting stickers on it and changing the hive's color or Cub Buddy appearance using skin stickers.
