Pathfinder kingmaker module pdf

Pathfinder Second Edition: Kingmaker Adventure Path - A New Nation Awaits The Stolen Lands, a disputed territory south of Brevoy, has long been plagued by bandits and monsters. However, with a newly granted charter, your party is tasked with exploring these wilds, defeating their dangers, and building a new nation. Assets required by Kingmaker module created with Caeora are now available. This includes Kingdom management features that can be accessed through Pathfinder Second Edition Game System. However, some bugs might still exist, so users are encouraged to report them on the Premium Content issue tracker for further assistance. The ability to use custom images for fog of war is a built-in feature in V11, but its hex-limited version remains exclusive to Kingmaker module. This may change in future updates. Currently, there are no plans to release a 5E version of Kingmaker, as the hex editing and Kingdom features are tightly tied to the PF2E game system. Existing customers will receive their PDFs through the Paizo store, while new buyers can expect discounts on purchasing the Kingmaker module after receiving their PDF. The Stolen Lands map was redesigned by Damien Mammoliti, offering improved tiles for adding features around the map and enhanced colors for digital display. The opportunity of a lifetime is presented as gamers are asked to join their enemies in becoming leaders of the world's greatest new nation. The initial release includes six chapters of the Kingmaker Adventure Path, with hundreds of Journal Entry Pages and dynamic links for Gamemasters. A high-resolution map of the Stolen Lands has been beautifully reimagined by Damien Mammoliti exclusively for Foundry Virtual Tabletop users. Custom Hex Exploration tools allow GMs to edit hexes, revealing features only when allowed, while adventure maps are remastered from assets provided by Narchy Maps and Alaustin from Forgotten Adventures. Remastered versions of region maps have been digitally upscaled for VTT use. 40+ scenes with pre-configured walls, lighting, sounds, and map-notes support Foundry's Overhead Tiles and Foreground Layer features. Portraits and token art are available for over 400 creatures and NPCs to enhance combat and story needs. Nearly 10 hours of music, ambient sounds, and sound effects have been carefully organized into hundreds of playlists. The Kingdom Actor Sheet has been coordinated with the Pathfinder Second Edition Game System, allowing all users access to kingdom management features. Future updates will include additional content such as journal entries, scenes, tokens, and audio before the end of the year. A limited-time offer provides a discount on the premium content module, available at $100 USD (regularly $120 USD) for a limited time.
