**Salton iced tea maker instructions diagram instructions pdf**

The Salton Iced Tea Maker is a convenient appliance that can make two liters of iced tea or coffee. It features a water level indicator, which helps users to perfectly brew their preferred beverage with minimal time and effort. Once the preparation is complete, the machine automatically shuts off. To use the Salton Iced Tea Maker, simply fill the carafe with water and select the desired amount based on the marked levels for different cup quantities. Next, pour the water into the brewing well and add two or three large tea bags depending on the desired strength of the tea. For iced coffee, place a small coffee filter in the filter area and add the preferred amount of ground coffee. Finally, flip the switch to "ON" and let the machine do its job. The tea or coffee will be brewed and automatically turned off when it's ready. The end result is a delicious beverage that can be served immediately to friends and family in a serving pitcher filled to the top.
