A course is a specific unit of study that typically spans one semester and earns credit towards the completion of a degree or diploma. The time spent on this course can vary, but it usually corresponds to a certain number of contact hours. For example, 1 hour of lecture, 2 hours of tutorial, or 4 hours of internship. To measure the relative weight of a course, universities use credit units, with one unit equivalent to one contact hour per week during a semester or 15 contact hours in total. Each course is assessed through two parts: coursework and exams. The coursework component accounts for 30-40% of the total marks and typically includes at least one homework assignment or two tests. The university examinations account for up to 70% of the total marks and usually take place during the last two weeks of the semester. A detailed timetable is published, outlining the exam dates, times, and rooms. Students are advised to carefully review this schedule to avoid clashes in their personal timetables. If issues arise due to limited time or examination rooms, students should inform the Examinations Coordinator immediately.
