The beloved Mattel franchise Masters of the Universe is returning to the big screen for the first time since 1987, and there are already a ton of exciting updates about the new live-action movie. Debuting in 1982 with the eponymous cartoon and best-selling toy line, the sword-and-sorcery franchise follows Prince Adam (a.k.a. He-Man) who defends the planet of Eternia from the dastardly Skeletor and his minions. Though the series was designed to sell toys, Masters of the Universe grew to become one of the most popular media franchises of the 1980s. Besides the 130-episode cartoon series that ran from 1983-1985, He-Man and his allies branched out into various comic books, video games, and even feature films. The 1987 film starred Rocky IV's Dolf Lundgren as the heavily muscled He-Man, but was something of a notorious flop that was nothing like the popular show. However, with '80s nostalgia at an all-time high, and filmmaking technology finally strong enough to bring Eternia to life properly, another live-action Masters of the Universe movie is on the way. With many details still unknown, the latest news regarding Masters of the Universe is in high demand. Related He-Man and the Masters of the Universe is a franchise that's been going since the 1980s, and its five TV shows vary significantly in quality. Masters Of The Universe Latest News Amazon Reveals the First Official Image From The Live-Action Movie Though the adaptation is still a ways away, the latest news comes in the form of BTS footage from Masters of the Universe at CinemaCon 2025. Universal Studios participated in the annual movie preview event, and shared some exciting behind-the-scenes looks at the forthcoming live-action adaptation. Unfortunately, the footage shown at CinemaCon isn't for public consumption yet, and hasn't been released. However, ScreenRant was in attendance and has provided a thorough description of the BTS glimpses. Read the footage description below: A BTS clip shows He-Man’s sword, with the director talking about the toys he had as a kid. “By the power of Grayskull!” is heard in the background. We see a lot of practical effects (mixed with VFX of course), accurate costumes from the cartoon, and huge physical sets. It ends with He-Man’s hair blowing in the wind. Though it is quite a ways off, the Masters of the Universe live-action movie is scheduled to be released on June 5, 2026 by Amazon/MGM. The film is expecting a theatrical debut, but details are still fuzzy this far removed from the release date. The premiere could always shift in the intervening years, and various project delays or speed-ups could necessitate a shifting of the currently established release date. Nevertheless, the release date is a good sign that Masters of the Universe is finally returning to the big screen after nearly 40 years. Shows starring He-Man include: Show Release Years Number Of Episodes He-Man and the Masters of the Universe 1983-1985 130 The New Adventures of He-Man 1990 65 He-Man and the Masters of the Universe 2002-2004 39 Masters of the Universe: Revelation 2021 15 He-Man and the Masters of the Universe 2021-2022 26 Netflix's Masters of the Universe: Revolution premiered on January 25, 2024, as the third part of the previous series, Revelation. Though most of the ensemble has yet to be filled, the starring role of Prince Adam/He-Man has found its actor in the upcoming live-action Masters of the Universe film. Rising star Nicholas Galitzine will pull double duty as Prince Adam and his superhero alter-ego He-Man, and it offers the young actor his first big break into the mainstream. Joining Galitzine is Riverdale alum Camila Mendes who will play Prince Adam's Royal Guard Captain and personal sorceress, Teela. Community and GLOW star Alison Brie has been cast as Evil-Lyn, Skeletor's second-in-command. Furthermore, Idris Elba is set to appear as Duncan (Man-at-Arms), a crucial He-Man ally and adoptive father to Teela in most versions of the story. Musician and actor Jared Leto joined the cast as the franchise's main villain, Skeletor, and he's joined by Sam C. Wilson as Trap Jaw. Villains Goat Man (played by Hafthor Bjornsson), and Tri-Klops (Kojo Attah) will appear as well. Deadpool star Morena Baccarin has been tapped to play The Sorceress, the magical guardian of Castle Greyskull. Meanwhile, Jóhannes Haukur Jóhannesson (Captain America: Brave New World) is playing Fisto, He-Man's warrior ally with a metal hand. He-Man's parents will be played by James Purefoy (A Knight's Tale) and Charlotte Riley (Peaky Blinders), with the former playing King Randor and the latter playing Queen Marlena. Sasheer Zamata (Agatha All Along) will play Suzie, while Jon Xue Zhang (Eternals) is Ram-Man, and Christian Vunipola (Queenpins) is Hussein. All three are He-Man allies. The confirmed cast of Masters of the Universe includes: Actor Masters of the Universe Role Nicholas Galitzine Prince Adam/He-Man Camila Mendes Teela Alison Brie Evil-Lyn Idris Elba Duncan (Man-at-Arms) Jared Leto Skeletor James Purefoy King Randor Charlotte Riley Queen Marlena Sam C. Wilson Trap Jaw Image via Max Hafthor Bjornsson Goat Man Kojo Attah Tri-Klops Morena Baccarin The Sorceress Jóhannes Haukur Jóhannesson Fisto Sasheer Zamata Suzie Image via Disney+ Jon Xue Zhang Ram-Man Christian Vunipola Hussein it stands to reason that Masters of the Universe will be an origin story that will more-or-less recreate what was seen in the cartoons and comics Though Netflix's controversial He-Man show attempted to expand the franchise, the live-action Masters of the Universe movie will be the biggest exposure the series has gotten in decades. Because of that pressure, the details around the movie's plot need to be perfect to not only please long-time fans but make the movie entertaining for newcomers as well. While the development of the Netflix movie yielded quite a few story details, it's safe to say that those are all gone since the streamer canceled its plans and shipped the IP off to Amazon. However, it stands to reason that Masters of the Universe will be an origin story that will more-or-less recreate what was seen in the cartoons and comics. As an infant, Prince Adam was sent from Eternia to Earth where he lost connection with his magic sword. However, when he reached adulthood, Adam found the sword and was returned to Eternia. Fighting as He-Man, Prince Adam must then protect the kingdom from evil-doers like Skeletor. While amendments to the main story are possible, those details will likely remain intact. Masters of the Universe (2026) follows Prince Adam nearly two decades after his arrival on Earth as he is summoned back to Eternia. To combat the villainous Skeletor, Adam must unlock the secrets of his past and transform into He-Man, embracing his destiny to save his homeland. For the first time in nearly four decades, He-Man and the wondrous world of Eternia will be brought to life in a live-action feature for the upcoming Masters of the Universe movie from Amazon MGM Studios and Mattel Films. It has taken a while for the latest cinematic adaptation of the popular toyline and animated series to get out of development hell but the magic is now in progress. See for yourself with this guide to everything we know about the Masters of the Universe movie so far.(Image credit: Netflix)By the power of Grayskull (and the aforementioned Amazon MGM Studios and Mattel Films), Masters of the Universe is set to hit theaters everywhere on Friday, June 5, 2026.When the reboot film was first announced in 2019, it was set to be released on Netflix and given a 2020 release date but was held back due to the pandemic. The film was later revived with plans to start shooting in mid-2022, and those were abruptly cancelled not long after. You may like What Masters Of The Universe Is About(Image credit: Mattel)Taking its inspiration from the popular action figures, Masters of the Universe's central character is He-Man – the super-powered alter ego of Adam, a barbarian prince hailing from the planet Eternia. It is there where he and his companions — including his twin sister, Adora, or She-Ra — engage in a series of battles against their nefarious archnemesis, Skeletor, who wishes to conquer Eternia by uncovering the secrets of Castle Grayskull.The Masters of the Universe toy line was first launched by Mattel in 1982. While the fun of having an action figure set is the freedom to imagine your own battle scenarios, the adventures of He-Man and other characters from the franchise were also chronicled in accompanying minicomics, which were followed by a run in DC Comics, and an animated series. More on that later…The Sword Of Power Has Been Revealed(Image credit: Netflix)Just a month after Masters of the Universe started shooting in January 2025, Amazon MGM Studios released its first sneak peek at the film with a photo that is not too revealing but gives fans plenty of reasons to be excited. Take a look at the image below:(Image credit: Amazon MGM Studios)The photo appears to be of a bulked-up Nicholas Galitzine in character as He-Man holding the hero’s famed Sword of Power, which imbues him with his warrior strength. Our own Adam Holmes reacted to the photo with a plea to have his own Sword of Power, raising hope that Mattel will release some realistic replicas by the time the film is released. Galitzine also shared the photo to his Instagram with a caption reflecting on the “several months of training” he underwent to play Prince Adam and his excitement to share this new vision of Eternia.Your Daily Blend of Entertainment NewsThe Masters Of The Universe CastI imagine that fans of He-Man have a preconceived idea of what type of actor should play the iconic hero. Well, let’s take a look at who Amazon MGM has chosen to lead the Master of the Universe cast and who else is joining him for this new adventure.Nicholas Galitzine (He-Man/Prince Adam)(Image credit: Starz)The new He-Man will be played by Nicholas Galitzine, who has starred in numerous Amazon Prime original movies already, including 2023’s Red, White & Royal Blue and The Idea of You from early 2024. The English actor’s casting follows two previous announcements that the lead Masters of the Universe role was filled – first by Noah Centineo, who dropped out as Covid-19 continued to hold the project back, and then by Kyle Allen, who was brought in until it hit another snag.Camila Mendes (Teela)(Image credit: The CW)Teela – the Captain of the Royal Guard at the palace of Eternos, who serves as Prince Adam’s trainer and protector – will be played by Camila Mendes, as THR reported in August 2024. The character – who also fights battles with He-Man while unaware he is Adam’s alter ego – marks a major departure for the former Riverdale cast member, who is otherwise best known for rom-com films like the funny Palm Springs (one of the best movies on Hulu) or Amazon’s Upgraded. Then again, she also starred in a crime thriller called Coyote Lake from 2019 and led Netflix’s Dangerous Lies the following year.Alison Brie (Evil-Lyn)(Image credit: Apple TV+)You could probably guess by her name alone that Evil-Lyn – the only female member of the Evil Warriors and second-in-command to Skeletor – is a villain. She will be played by Alison Brie. The actor broke through as Annie in the Community cast and later starred on Netflix’s GLOW but has also taken on darker roles, such as in Horse Girl and the Oscar-winning Promising Young Woman.Idris Elba (Duncan / Man-At-Arms) (Image credit: Marvel Studios)Duncan – whose title, “Man-At-Arms,” is described as an advisor of Eternia’s ruling monarch and the Royal Guard – will be played by Idris Elba, who played the somewhat similar role of Heimdall in the Thor movies. In fact, Masters of the Universe will be only the latest of many comic book films the six-time Emmy nominee has participated in, also including two DC films (The Losers and 2021’s The Suicide Squad) and the non-MCU Marvel flick, Ghost Rider: Spirit of Vengeance.Morena Baccarin (Sorceress Of Castle Grayskull)(Image credit: Fox)Playing Sorceress of Castle Grayskull, who guards the fortress’ secrets with magic, is Morena Baccarin, who is also no stranger to comic book adaptations, having voiced Talia Al Ghul in some animated Batman movies, played Leslie Thompkins in the Gotham cast, and starred in the Deadpool movies as Vanessa. She had previously earned her “Geek Goddess” status as part of the Firefly cast in the role of Inara Serra.James Purefoy (King Randor Grayskull)(Image credit: Sony)James Purefoy – starring as Adam’s father, King Randor – has one previous comic book adaptation under his belt called Pennyworth (following Bruce Wayne’s butler’s early days in espionage). Highlights of the English actor’s resume also include A Knight’s Tale, HBO’s Rome, Disney’s John Carter, and creator Kevin Williamson’s crime drama, The Following.Sam C. Wilson (Trap Jaw)(Image credit: HBO)Skeletor’s cybernetic henchperson, Trap Jaw, who gets his name for his deadly bite, will be played by Sam C. Wilson of BBC’s Dodger fame. He is also known for appearing in a couple of episodes of House of the Dragon as Blood and is also set to star in the upcoming series, Blade Runner 2099, for Amazon MGM.Jóhannes Haukur Jóhannesson (Fisto)(Image credit: HBO)A fierce, heroic warrior named Fisto, known for having a large metal fist for a right hand, is being portrayed by Jóhannes Haukur Jóhannesson, who is no stranger to fantasy epics, having appeared in the Game of Thrones cast as Lem Lemoncloak, in Vikings: Valhalla as Olaf Haraldsson, and more. The Icelandic actor more recently appeared in Marvel’s Captain America: Brave New World as Copperhead.Kojo Attah (Tri-Klops)(Image credit: ITV)As Tri-Klops, one of Skeletor’s top warriors, we have Kojo Attah, whose last major “warrior” role was in the 2020 video game Troy: A Total War Saga as the voice of Memmon. The actor would later work with Jason Statham in Wrath of Man and The Beekeeper, They also appeared in Netflix’s sci-fi series, Supacell.John Xue Zhang (Ram Man)(Image credit: Netflix)Ram Man, who was literally described by Mattel as a “human battering ram,” is being played by John Xue Zhang, who has performed stunts for such films as Fast and Furious Presents: Hobbs and Shaw and Eternals. He has also scored acting roles in shows like Netflix’s The Brothers Son and movies like Kraven the Hunter.Hafþór Júlíus Björnsson (Goat Man)(Image credit: HBO)Playing a minor villain named Goat Man – who debuted in the 1985 Golden Book, Secret of the Dragon’s Egg before appearing in the Masters of the Universe: Revelation episode “Hope, for a Destination” – is Hafþór Júlíus Björnsson. The Icelandic strongman made his acting debut as one of multiple actors in the TV role of The Mountain on Game of Thrones and later starred in 2022’s The Northman, most notably.Charlotte Riley (Queen Marlena)(Image credit: Tandem Communications)As Marlena – King Randor’s wife and Adam’s mother – we have Charlotte Riley, who met her husband, Tom Hardy, while playing the romantic leads of Masterpiece’s two-part adaptation of Wuthering Heights. She would later be known for films like Edge of Tomorrow and London Has Fallen and series like Peaky Blinders.Sasheer Zamata (Suzie)(Image credit: Marvel Studios)Sasheer Zamata has joined the Masters of the Universe cast as a new character named Suzie, but it will not mark the first time the SNL alum has branched out beyond comedy. She starred in a Blumhouse thriller called Sleight, was in the 2020 found footage horror movie Spree, appeared in Showtime’s Waco: The Aftermath, and joined the MCU in Agatha: All Along.Christian Vunipola (Hussein)(Image credit: Hulu)Also starring in an original role, named Hussein, is Christian Vunipola. Some of his previous acting roles include 2022’s Not Okay and Hulu’s Miguel Wants to Fight.Travis Knight Is Directing(Image credit: Paramount)Helming Masters of the Universe is Travis Knight, who already has experience with movies about toys, having made his live-action directorial debut with 2018’s Transformers movies spin-off, Bumblebee. His first directing credit was 2016’s Academy Award-winning Kubo and the Two Strings from Laika — the stop-motion animation studio he co-founded to produce acclaimed films like ParaNorman and The Boxtrolls.Handling screenwriting duties — following a previous draft by David Callaham and Aaron and Adam Nee — is fellow Laika veteran Chris Butler, who penned the likes of ParaNorman and Missing Link, in addition to working on the storyboarding for stop-motion classics Corpse Bride and Coraline. Producing credits on Masters of the Universe go to Todd Black, Jason Blumenthal, and Steve Tisch of Escape Artists and Robbie Brenner from Mattel Films.Masters Of The Universe Is One Of Many Upcoming Mattel Productions(Image credit: Warner Bros.)It would not be too much of a stretch to assume that the Masters of the Universe production got a healthy boost following the success of Barbie. However, He-Man is not the only toy hitting the big screen with help from the pink lady as there are several other films based on Mattel products currently in the works.You can expect to see a new feature based on the popular American Girl dolls, both a Hot Wheels movie and another based on Matchbox toy cars, and even upcoming flicks about the View-Master and the Magic 8 Ball. There are plenty more where those came from on the way.Previous Adaptations Of The Masters Of The Universe Toys(Image credit: Filmation)Masters of the Universe is far from the first screen adaptation of the eponymous action figure set as He-Man and the Masters of the Universe, one of the most beloved animated TV shows, premiered in 1983 just a year after the toys launched. In fact, this will only be the franchise’s second live-action movie, following the 1987 release of Masters of the Universe, starring Dolph Lundgren as He-Man and Frank Langella as Skeletor, which is actually considered to be one of the worst movies based on a classic toy by many.The franchise’s first-ever movie, however, was 1985’s He-Man and She-Ra: The Secret of the Sword, which was later televised as a mini-series. The adventures continued to expand on the small screen in later years with 1990’s The New Adventures of He-Man, another remake from 2002, and two animated reboot series on Netflix in 2021, including the Kevin Smith-produced Masters of the Universe: Revelation, and a 2024 miniseries called Masters of the Universe: Revolution. There were also two spin-off series centered on He-Man's sister, with Netflix's more recent hit She-Ra: Princesses of Power being an update of the characters' '80s spin-off.How to watch previous Masters of the Universe adaptationsWill this new interpretation of Masters of the Universe “have the POWERRRRRRR!” to win audiences over? We will just have to see when He-Man returns to the big screen in 2026. A young man on Earth discovers a fabulous secret legacy as the prince of an alien planet, and must recover a magic sword and return home to protect his kingdom.A young man on Earth discovers a fabulous secret legacy as the prince of an alien planet, and must recover a magic sword and return home to protect his kingdom.You have no recently viewed pages Some toy brands are effortlessly eternal. Or, at least, inescapable. Mattel struck gold with Greta Gerwig’s Barbie in 2023, but even before that film won a billion at the box office and clinched a few accolades during awards season, the Barbie brand was in good enough shape. Other brands have to work a lot harder to keep interest in their property alive: Transformers and G.I. Joe have each struggled to give their cinematic franchises a new life. It’s not easy appealing to the next generation, especially with traditional toys and action figures — bread and butter for a lot of these brands — largely appeal only to collectors now.Something like Masters of the Universe, meanwhile, falls somewhere in between blockbuster success and nigh-obscurity. Yes, the 1984 cartoon is a classic, but can this translate into a live-action tentpole? For the first time since 1987, Mattel is trying once more to turn He-Man into the action hero he was always meant to be. The company is partnering with Amazon MGM for a new Masters of the Universe — and though it’s a pretty nostalgic property, it’s also had several animated reboots and continuations over the years. In fact, as of right now, there are two distinct contemporary animated versions of Masters of the Universe on Netflix: a 3D animated reboot called He-Man and the Masters of the Universe (2021), as well as the Kevin Smith-created Masters of the Universe: Revelation (2021) and its sequel series, Revolution (2023), which use more traditional animation.Those animated projects have been star-studded and generally well-received. But, it's not been since 1987 that there’s been a big swing of the power sword at box office domination. Here’s everything you need to know about the next big version of He-Man and his Masters of the Universe.What is the Masters of the Universe release date?Masters of the Universe quietly began filming in February 2024. Production took place primarily in the UK and wrapped in the summer of 2025. It’s officially set to hit theaters on June 5, 2026, so He-Man fans will have to wait a little less than a year to see this new vision of Eternia. Who is directing Masters of the Universe?Bumblee director Travis Knight has been tapped to helm Masters of the Universe.John Lamparski/WireImage/Getty ImagesAnimator and director Travis Knight will helm the Masters of the Universe remake. He’s perhaps best known for revitalizing the Transformers franchise with Bumblebee — arguably the strongest entry in that saga — but he’s also been involved in a handful of great films for Laika Studios. He produced ParaNorman and The Boxtrolls before directing Kubo and the Two Strings, making him a great fit for something like Masters of the Universe. Ideally, he’ll bring his unique vision to the live-action film, capitalizing on the whimsy and spectacle that fans will be hoping for.What is the plot of Masters of the Universe?Amazon MGM is keeping most details about Masters of the Universe under lock and key, but the studio did release an official synopsis when it announced a release date for the film. Where the original Masters of the Universe film, released in 1987, was pretty similar to the plot of Thor — sending its heroes from their far-flung home planet to slum it on Earth — the reboot will flip that fish-out-of-water premise on its head. Masters of the Universe follows “10-year-old Prince Adam, who crashed to Earth in a spaceship and was separated from his magical Power Sword — the only link to his home on Eternia. After tracking it down almost two decades later, Prince Adam is whisked back across space to defend his home planet against the evil forces of Skeletor. But to defeat such a powerful villain, Prince Adam will first need to uncover the mysteries of his past and become He-Man: the most powerful man in the Universe!” Who is in the cast of Masters of the Universe?Nicholas Galitzine is He-Man in Amazon’s Masters of the Universe reboot.Amazon MGMHere are the actors confirmed to star in Masters of the Universe:Nicholas Galitzine as Prince Adam, the rightful heir of the kingdom of Eternos.Camila Mendes as Teela, the Captain of the Royal Guard at the palace of Eternos.Idris Elba as Man-at-Arms, Teela’s adoptive father and a military advisor to Eternos’ reigning monarch. Jared Leto as Skeletor, an evil demon determined to amass enough power to become the master of the universe.Alison Brie as Evil-Lyn, a powerful witch and Skeletor’s second-in-command.Morena Baccarin as the Sorceress, the guardian of Castle Grayskull — the center of all power in the universe.Charlotte Riley as Queen Marlena, Adam’s long-lost mom.James Purefoy as King Randor, ruler of Eternos and Adam’s father.Sasheer Zamata as Suzie, a new character rumored to be one of Adam’s friends from Earth.Christian Vunipola as Hussein, another character created specifically for the film, and likely another Earth-bound friend of Adam’s.Will there be any other secret cast members? Maybe. Original He-Man actor Dolph Lundgren recently told Men’s Journal that “maybe I’ll get involved.” Is there a trailer for Masters of the Universe?Amazon MGM hasn’t released a trailer for Masters of the Universe just yet. We’ll update the codex with updates down the line.Will there be a sequel to Masters of the Universe?The “original” Masters of the Universe never got a sequel, despite teasing one pretty heavily. But if Mattel’s second attempt achieves success similar to Barbie's, there’s every chance this saga could continue with new movies.Learn Something New Every DaySubscribe for free to Inverse’s award-winning daily newsletter! Entertainment gossip and news from Newsweek's network of contributorsThe He-Man movie is happening. Officially titled Masters of the Universe, it's a live-action take on the classic '80s comic book character, the first in almost 40 years. Here's everything you need to know.Masters of the Universe was confirmed by actor Nicholas Galitzine, who stars as the brawny superhero in Amazon MGM's upcoming film. On Monday, Feb. 24 he shared the first in-costume photo on Instagram, posing topless with the iconic Power Sword.Galitzine, who previously featured in Cinderella, Bottoms, and Red, White, and Royal Blue, revealed his intense preparation in the caption. Nicholas Galitzine stars as He-Man in Masters of the Universe Nicholas Galitzine stars as He-Man in Masters of the Universe Amazon Studios "After several months of intense training, I'm thrilled to share that we're officially in production on Masters of the Universe. Our director, Travis Knight, has assembled the most incredible ensemble cast and created a stunning tapestry of Eternia and its surrounding world. I can't wait for you to see. More to come, but until then, here's a sneak peek at the Sword of Power. By the power of Grayskull!"Galitzine joins more than a few famous faces in what could almost be called an all-star cast. Jared Leto stars as the villainous Skeletor, while rounding out the cast are Idris Elba, Camila Mendes, Morena Baccarin, James Purefoy, and Alison Brie.There's even an appearance by the world's strongest man, Hafthor Bjornsson. Here's the full Masters of the Universe cast list.Masters of the Universe CastNicholas Galitzine ("He-Man")Camila Mendes ("Teela")Morena Baccarin ("The Sorceress")James Purefoy ("King Randor")Alison Brie ("Evil-Lyn")Charlotte Riley ("Queen Marlena")Jóhannes Haukur Jóhannesson ("Malcolm/Fisto")Jared Leto ("Skeletor")Idris Elba ("Duncan/Man-at-Arms")Sam C. Wilson ("Trap Jaw")Hafthor Bjornsson ("Goat Man")Kojo Attah ("Tri-Klops")Sasheer Zamata ("Suzie")John Xue Zhang ("Ram-Man")Christian Vunipola ("Hussein")Masters of the Universe DirectorDirected by Travis Knight (Bumblebee), Masters of the Universe is a faithful adaptation of the classic He-Man story. Chris Butler, who teamed with Knight on Kubo and the Two Strings, is writing the screenplay, with the initial draft written by David Callaham, and Aaron and Adam Nee.Masters of the Universe PlotThe film is an origin story of He-Man, charting his rise from a lost kid to the universe's most powerful man. As detailed by Mattel Films, Masters of the Universe starts by introducing us to ten-year-old Prince Adam, a resident of the magical planet Eternia.After crash-landing on Earth in a spaceship and losing his magical Power Sword, Prince Adam sets off on an adventure to reclaim it and defend his home against the evil forces of Skeletor.According to IMDb's official synopsis, the plot is as follows: "In furthest regions of space the kingdom of Eternia is threatened by the villainous Skeletor and his mischievous armies of darkness. To save his father's kingdom and protect the lives of those he holds dear young Prince Adam has to retrieve a mythical sword and become the fabled warrior only known as 'He-Man'."Masters of the Universe TrailerWith the film expected to hit theaters in 2026, production has yet to start on Masters of the Universe. So when can we look forward to a trailer? The earliest would be December 2025, given Barbie's first trailer also dropped in December ahead of its Summer release the following year.Who is He-Man?He-Man first appeared in the 1981 comic book He-Man and the Power Sword. 1983 saw the premier of the character's first animated series, He-Man and the Masters of the Universe. In 1987 Dolph Lundgren played He-Man in a live-action adaptation called Masters of the Universe.Masters of the Universe Release DateMasters of the Universe is currently set to hit theaters June 5, 2026. Mattel Films, who helped bring Barbie to a billion at the 2023 box office, will be hoping for similar success. Synopsis When the evil Skeletor (Frank Langella) finds a mysterious power called the Cosmic Key, he becomes nearly invincible. However, courageous warrior He-Man (Dolph Lundgren) locates inventor Gwildor (Billy Barty), who created the Key and has another version of it. During a battle, one of the Keys is transported to Earth, where it is found by teenagers Julie (Courteney Cox) and Kevin (Robert Duncan McNeill). Now both He-Man and Skeletor's forces arrive on Earth searching for the potent weapon.
